

# ASUS ZENFONE 3 Zoom Back Camera Replacement

This guide will help you remove and replace the back camera on the Asus Zenfone 3 Zoom.

Written By: Henry Barrett

## INTRODUCTION

This guide will demonstrate how to replace the back camera of a Zenfone 3. This may be necessary if the camera no longer shows a picture or shows a distorted picture. For this guide, you will need the tweezers, Torx T2 screwdriver, a prying tool, and the Phillips #00 screwdriver.

## TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [T2 Torx Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Tweezers](#) (1)

## Step 1 — Battery

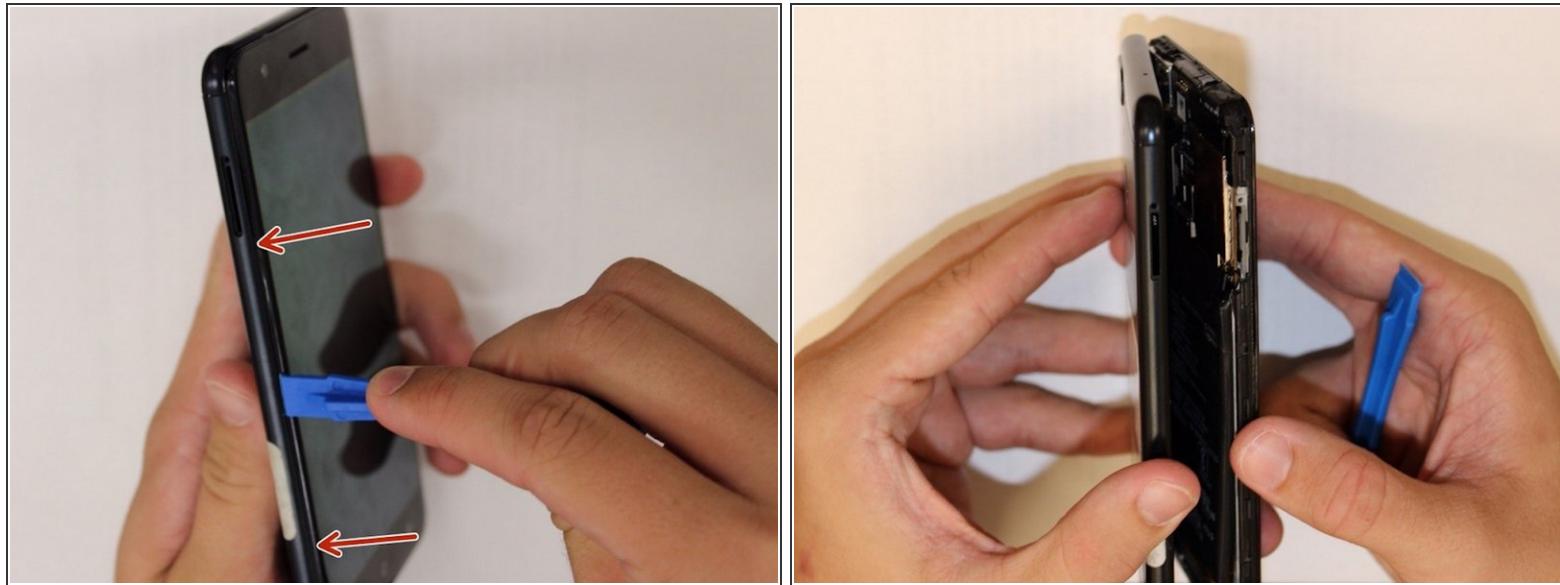

- Using a pair of tweezers, pull out the SIM card tray and set it to the side.

## Step 2

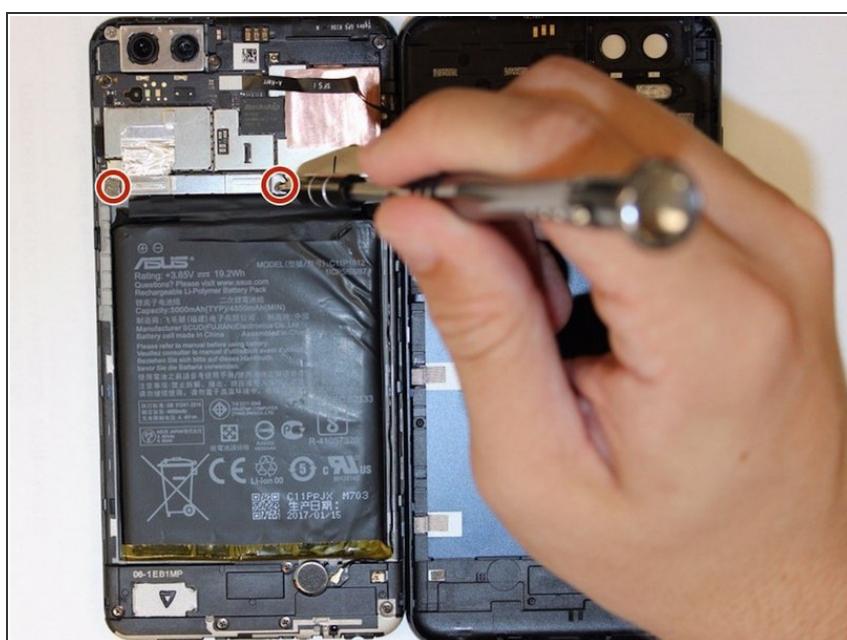

- Remove the two 2 mm screws using a Torx T2 screwdriver.

## Step 3

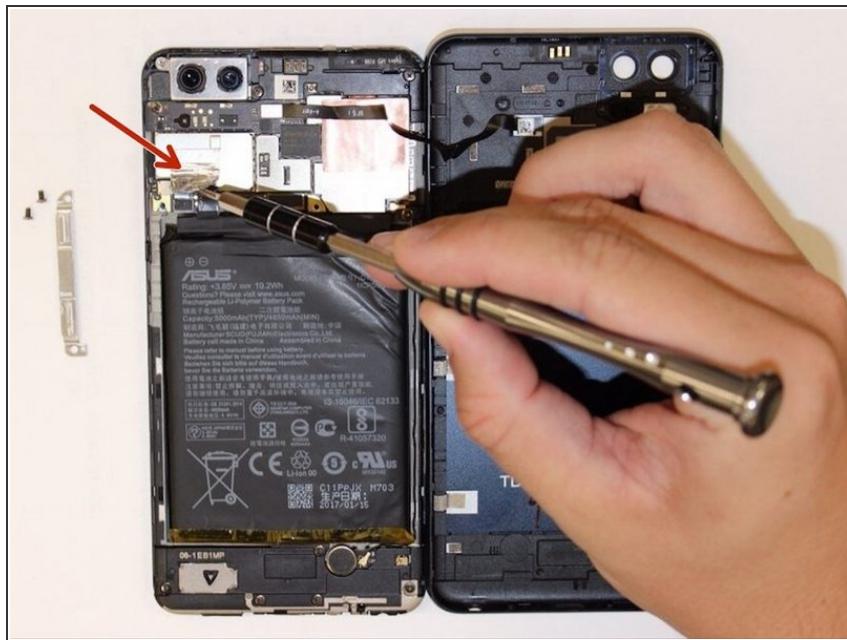

- Insert a prying tool between the screen and the metal backing of the phone at the bottom to remove backing from phone.
- There will be a thin film connecting the two pieces. You do not need to remove this. Just fold the two pieces apart with the inside facing up.

## Step 4

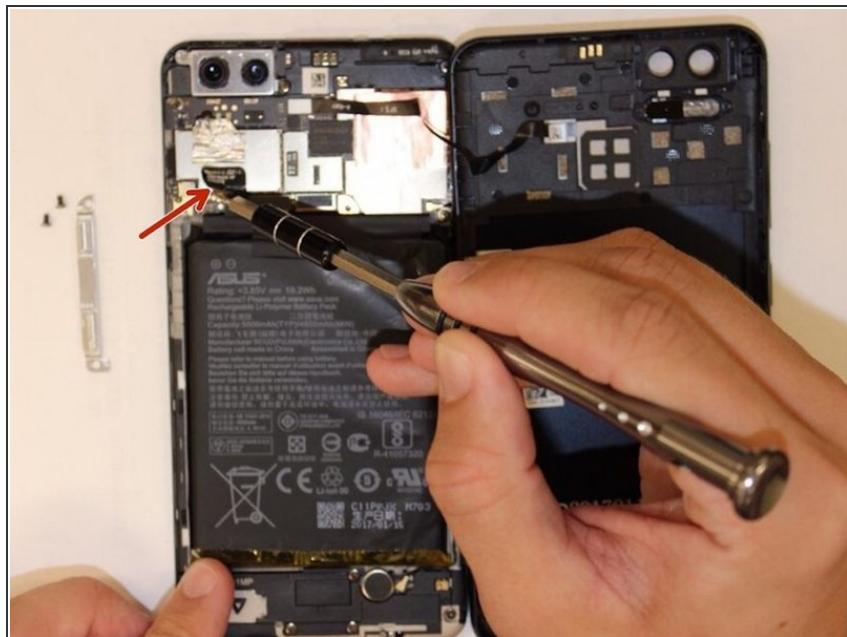

- Remove the two 3 mm screws, using the Phillips #00 screwdriver, on the silver band at the top of the battery and remove the band.

## Step 5

- Peel back the silver tape.

## Step 6

- Disconnect the battery connections.

## Step 7

- Pry and remove the battery.

*(i)* The underside of the battery is adhesive so make sure to pry the battery off gently.

## Step 8 — Back Camera

- Remove the 3 mm screws, using the Phillips #00 screwdriver, from the black plastic piece at the top on the right side.

## Step 9

- Remove the 3 mm screws, using the Phillips #00 screwdriver, from the metal piece around the camera.

## Step 10

- Remove the 3 mm circuit board screws, using the Phillips #00 screwdriver.

## Step 11

- Unplug the two wires at the bottom of the circuit board.

## Step 12

- Remove the circuit board.

## Step 13

- Unplug the camera.

To reassemble your device, follow these instructions in reverse order.
