

ATT Trimline 210M Back Cover Disassembly

Prerequisite for other guides.

Written By: Juan Carrillo

INTRODUCTION

The back cover is easily removed by inserting a Metal Spudger on the bottom of the phone. Be careful not to use too much force when attempting to open up the phone.

TOOLS:

- [Metal Spudger](#) (1)
-

Step 1 — ATT Trimline 210M Back Cover Disassembly

- Open up the phone with a metal spudger, sticking it in the bottom near the cord jack entry.

⚠ Be careful with the amount of force you use, or the plastic may crack.

Step 2

- Pull up on the spudger while simultaneously pulling up the top shell of the phone.

Step 3

- After unclipping the bottom half of the shell, pull upward from the position shown in the picture to detach the top half of the shell.

⚠ The cord connecting the speaker is short, and may detach if not done carefully.

Step 4

- You will have the motherboard and speaker exposed to you.

To reassemble your device, follow these instructions in reverse order.
