

Acer Aspire One 722 RAM Replacement

A guide on how to replace the RAM on the Acer Aspire One 722.

Written By: Christian Barboza

TOOLS:

- [Essential Electronics Toolkit](#) (1)
-

Step 1 — Battery

- Shut the netbook off (Power down netbook at top left corner).

Step 2

- Close the netbook and flip it over so that the back is facing up.

Step 3

- Slide the button below the battery to the right while simultaneously pulling the battery out.

Step 4

- Remove the old battery and get the replacement battery.

Step 5

- Check the thin grooves on the side of the battery entry and line the replacement battery up to that.

Step 6 — RAM

- Remove the screw at the bottom of the laptop.

Step 7

- Take the plastic backing plate off.

Step 8

- Unclip the two metal braces that hold the RAM in place by pushing the metal clips outwards away from the RAM itself.

Step 9

- Grab the RAM and remove slowly.

Step 10

- Take the replacement RAM stick and line up the the grooves on the RAM to the grooves on the netbook so that they will fit in flush.

Step 11

- Press down on the RAM stick and the metal clips will lock in to place.

To reassemble your device, follow these instructions in reverse order.
