

Acer Aspire One D250-1151 Keyboard Replacement

This guide will help you replace your keyboard.

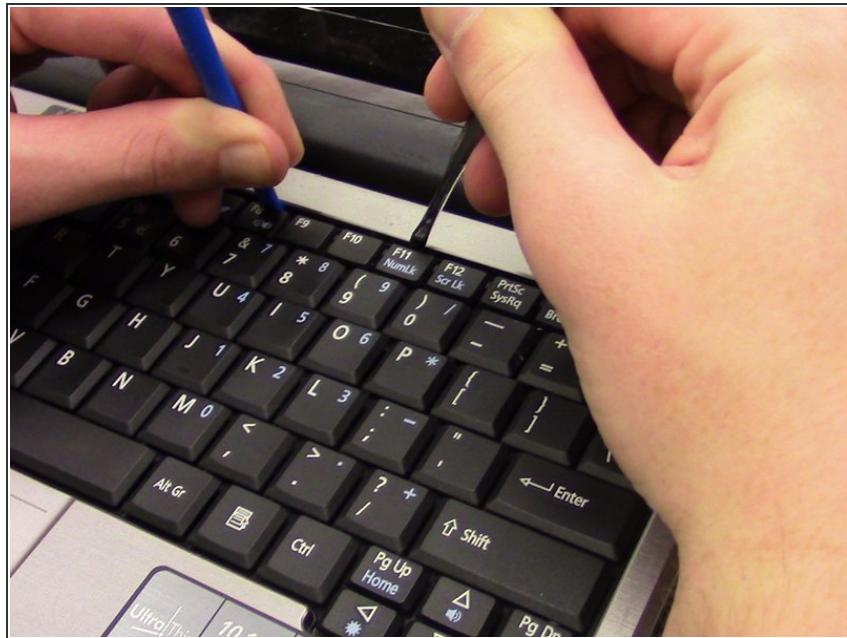

Written By: Donny McKay

 **TOOLS:**

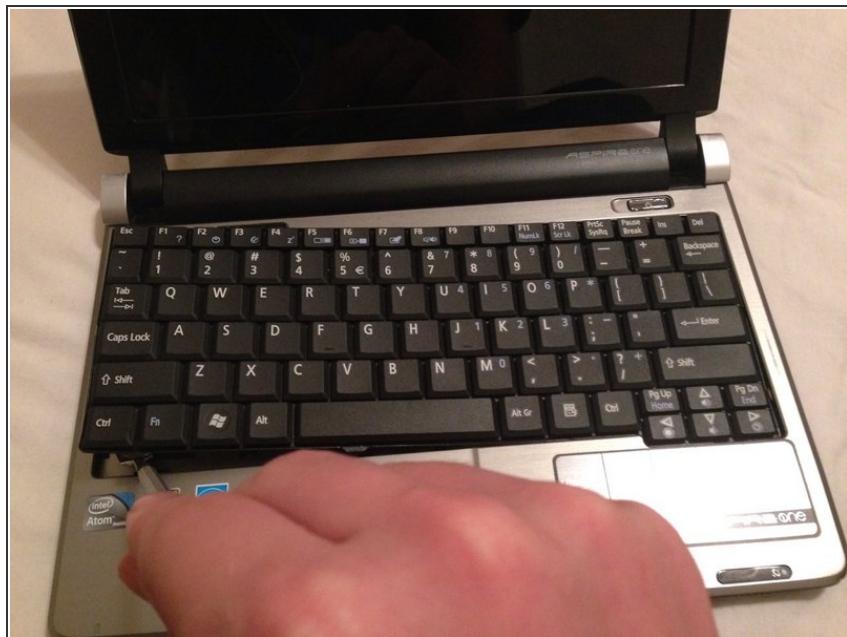

- [Metal Spudger \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

Step 1 — Keyboard

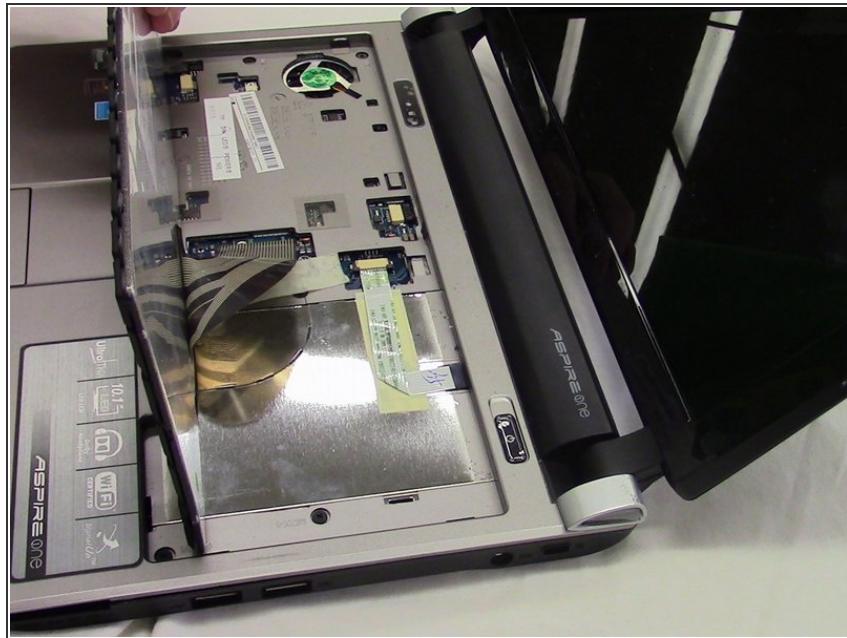

- Push the tab located behind the F8 key with a plastic opening tool.
- Fit a metal opening tool in between the keyboard and computer frame with the tab held.

Step 2

- Lift the keyboard up with the spudger and lift along edges until the keyboard is free.

Step 3

- Gently remove the keyboard power ribbon that is attached to the motherboard.

To reassemble your device, follow these instructions in reverse order.
