

Acer Aspire One D257 Battery Replacement

The replacement of the battery is described.

Written By: Claes

INTRODUCTION

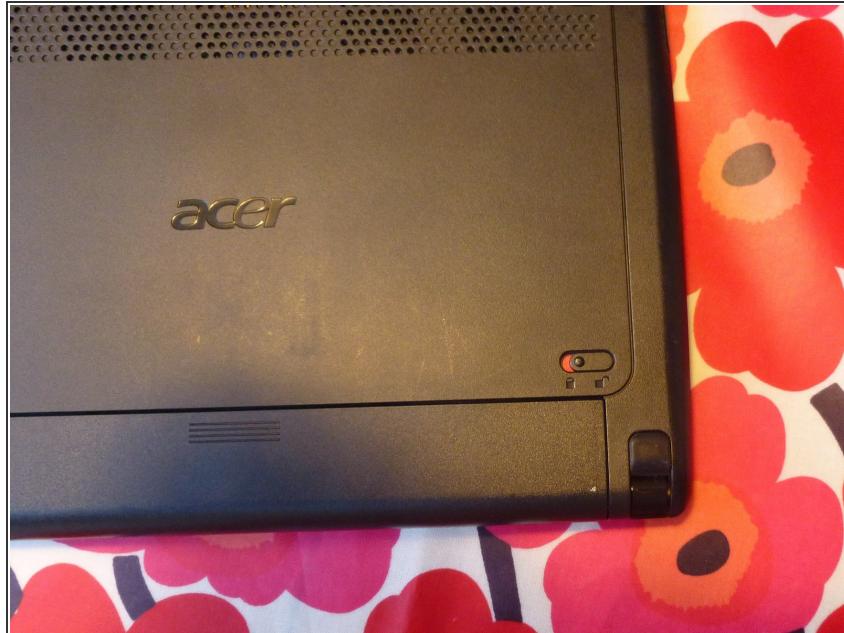

The replacement of the battery is described.

Step 1 — Battery

- Put the netbook, so the back side is upwards.

Step 2

- Push the right lock to the right so the red field is visible on the left.

Step 3

- Now move the left lock which is spring loaded to the left and keep it there. Then with the other hand remove the battery by pulling down.
- When reassembling the new battery push it up into the netbook and do lock the right by moving it to the left so the red field disappears.
