# INTRODUCTION

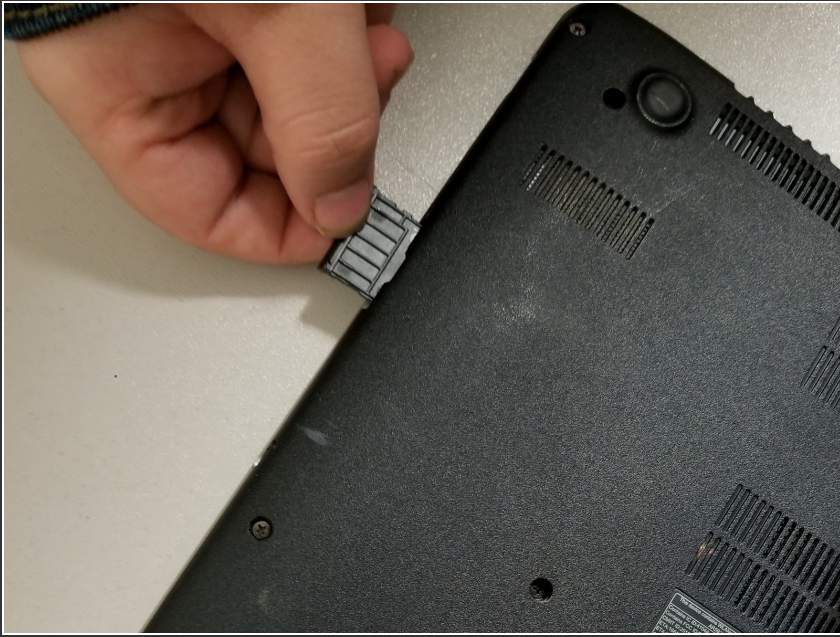

This guide will take a user through the replacement of the hard of drive.

## TOOLS:

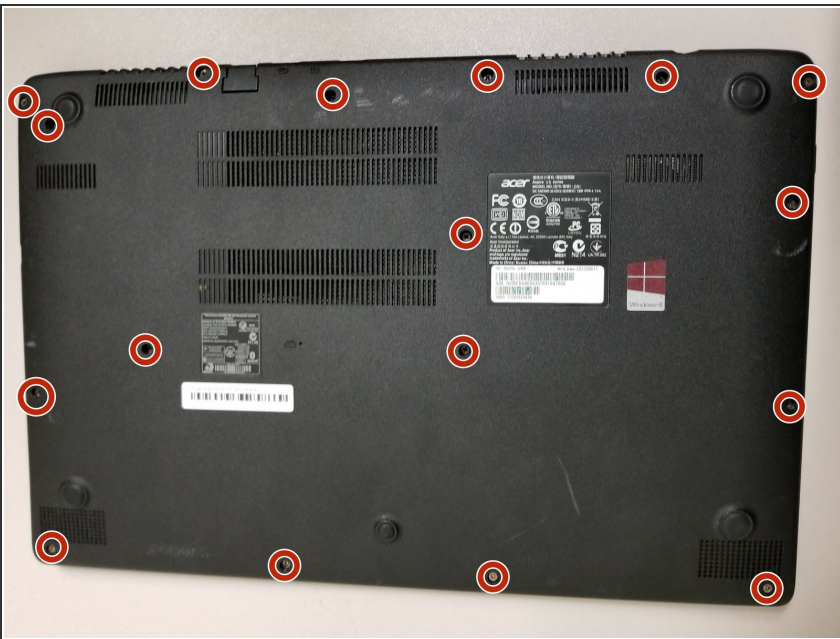

- [JIS #0 Screwdriver](#) (1)
-

## Step 1 — Back Case

- Remove the storage tray on the left edge of the device.

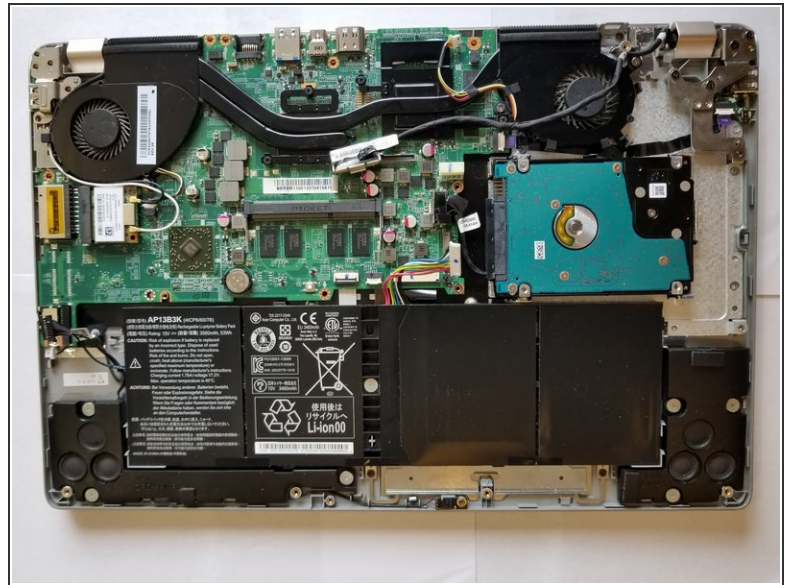

## Step 2

- Use a Phillips #0 screwdriver to remove seventeen 7mm screws from the lower case.

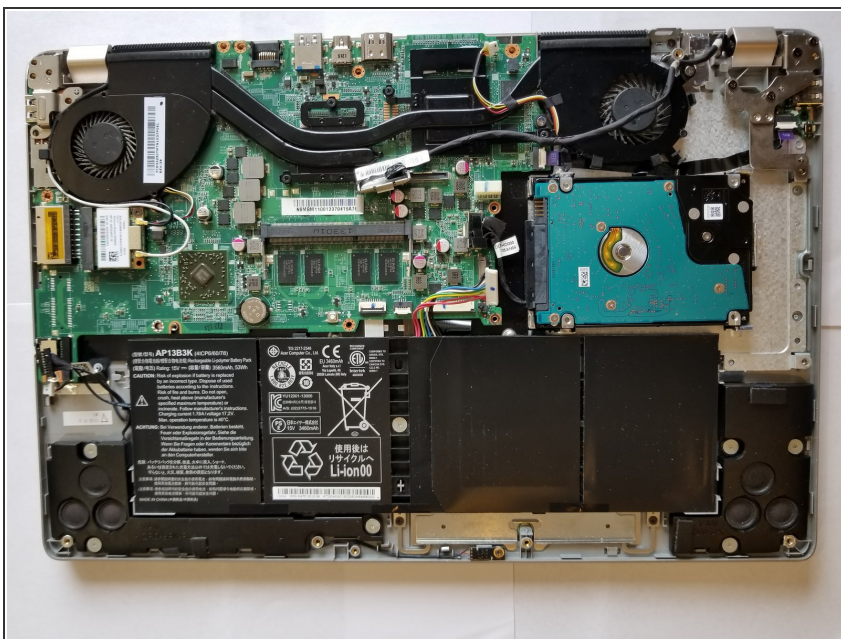

## Step 3

- Lift up the back case to remove it.

## Step 4 — Hard drive

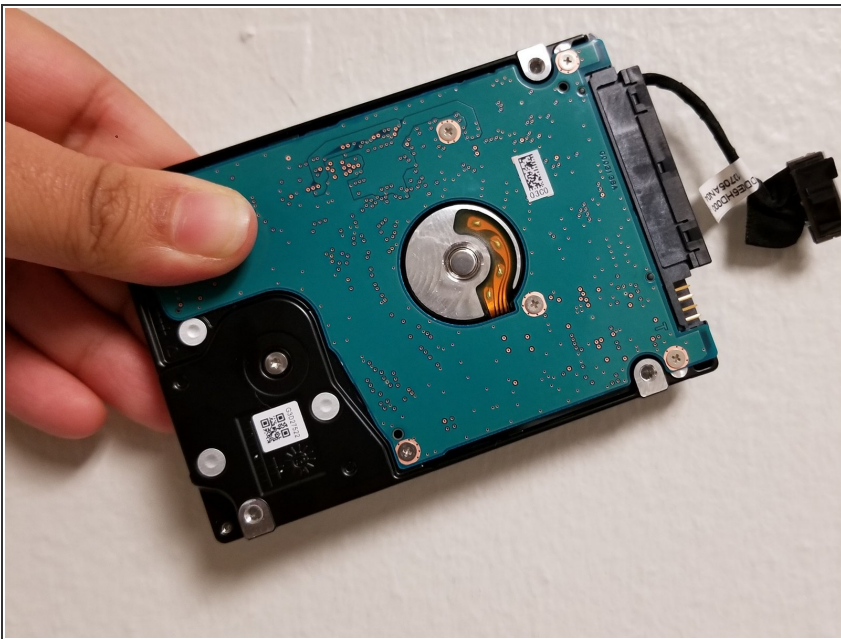

- The first thing that should be done it locate the the hard drive.Which is the large green blue rectangle on the left side

## Step 5

- The removal of the hard drive is actually a fairly easy thing to remove the only step is that the user should pull the black bundle cable from its slot by its purple tab.

## Step 6

- And then simple lift and remove and thats it the hard drive has been removed from its slot and is ready for its replacement.

To reassemble your device, follow these instructions in reverse order.
