# INTRODUCTION

Use this guide to replace the trackpad.

## TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [iFixit Opening Tool](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Battery

- Turn the Chromebook onto its backside and unscrew the the following Phillips #1 screws:
  - Sixteen 5mm Phillips screws located around the border.
  - Two 5mm Phillips screws located in center.

## Step 2

- Remove the back cover by carefully prying each side with an iFixit Opening Tool.
- Set aside back cover.

## Step 3

- Using a spudger, carefully unplug the rainbow wires connected to the top of the battery.

## Step 4

- Unscrew the 4mm Phillips #1 screw located at the top right of battery.

## Step 5

- Remove the battery.

## Step 6 — Trackpad

- Unscrew the seven 6mm Phillips screws located around the trackpad.

## Step 7

- Lift up the rectangular metal plate at the base.

## Step 8

- Flip the black bar where the white ribbon is connected to the trackpad upward to unlock it.
- Gently pull the white ribbon away from the trackpad.

## Step 9

- Gently lift the trackpad up and pull towards you to remove the trackpad.

To reassemble your device, follow these instructions in reverse order.
