

Acer Chromebook C710-2833 Hard Drive Replacement

A replacement guide that walks users how to safely remove and install a hard drive in the Acer Chromebook C710-2833.

Written By: Nicholas Latorre

INTRODUCTION

In this replacement guide, you will safely remove and install a hard drive.

TOOLS:

- [64 Bit Driver Kit](#) (1)
- [Anti-Static Wrist Strap](#) (1)
- [Magnetic Project Mat](#) (1)

Optional

PARTS:

- [16 GB SSD Sandisk SDSA5AK-016G-1014](#) (1)

Step 1 — Hard Drive

- Flip your Chromebook over so the bottom is facing up.

Step 2

- Locate the 6 mm Phillips #00 screw that holds the back cover together. Use your driver with the PH00 bit attached to unscrew it.
- Once completely unscrewed, carefully lift the cover off.
- Place the screw and cover safely to the side for now.

This document was generated on 2019-10-15 02:43:53 AM (MST).

Step 3

- Now take your anti-static wrist strap and place it tightly on your wrist.
- Attach the alligator clamp of the wrist strap to something that will ground yourself to avoid possible electric zaps.
- ⓘ The location chosen in the picture is recommended.

Step 4

- Locate the hard drive.
- Locate the four 3 mm Phillips #00 screws on each corner of the hard drive.
- Take your driver with the PH00 bit attached and unscrew all four screws.
- Place the screws off to the side for now.

Step 5

- Once all the screws are out, gently pull the hard drive out as pictured.

To reassemble your device, follow these instructions in reverse order.
