

Acer Chromebook C740-C4PE Touchpad Replacement

This guide will demonstrate how to remove the touchpad in an Acer C740-C4PE.

Written By: Jacob Kahn

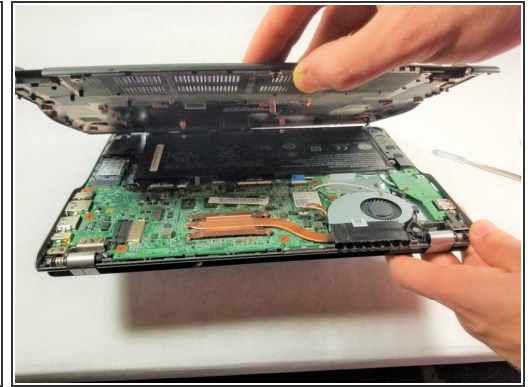

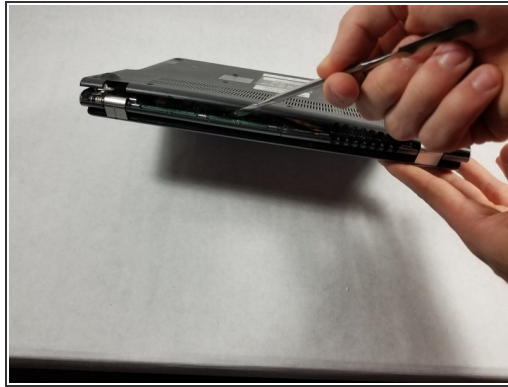

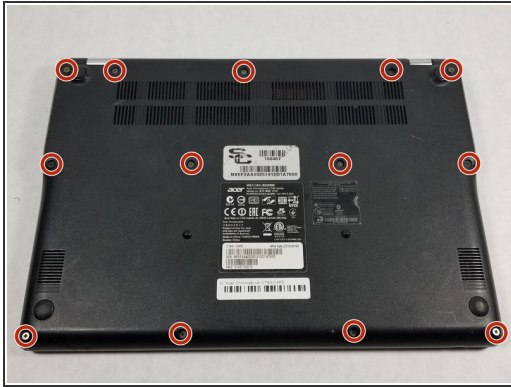

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Battery

- ❗ Make sure the laptop is turned off and unplugged before starting.
- Unscrew the thirteen 10mm screws on the back of the computer using the Phillips #0 screwdriver.
- Using the spudger or other prying tool, gently pry the back off of the device.
- ⚠ Be sure not to pry too hard as it may result in snapping the back plate.

Step 2

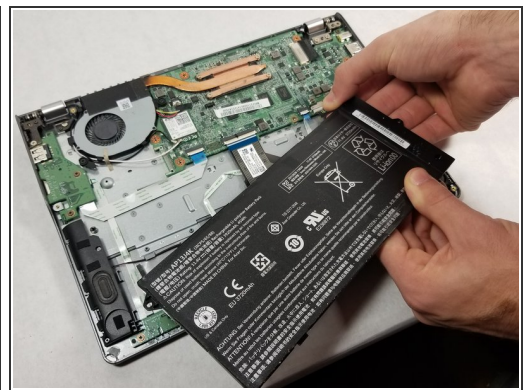

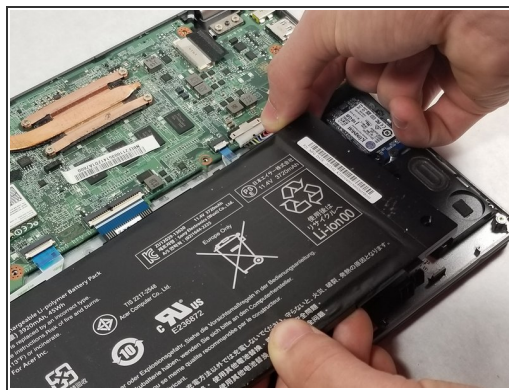

- Unscrew the two 5mm battery screws using the Phillips #0 screwdriver.

Step 3

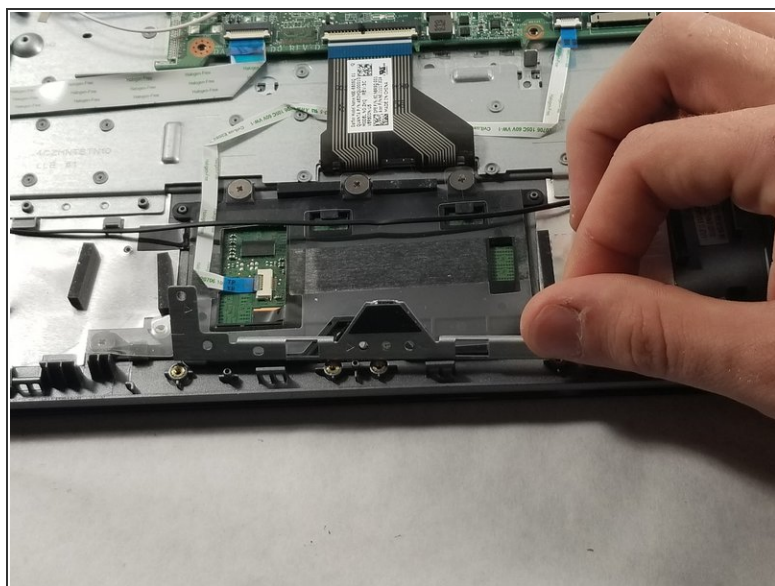

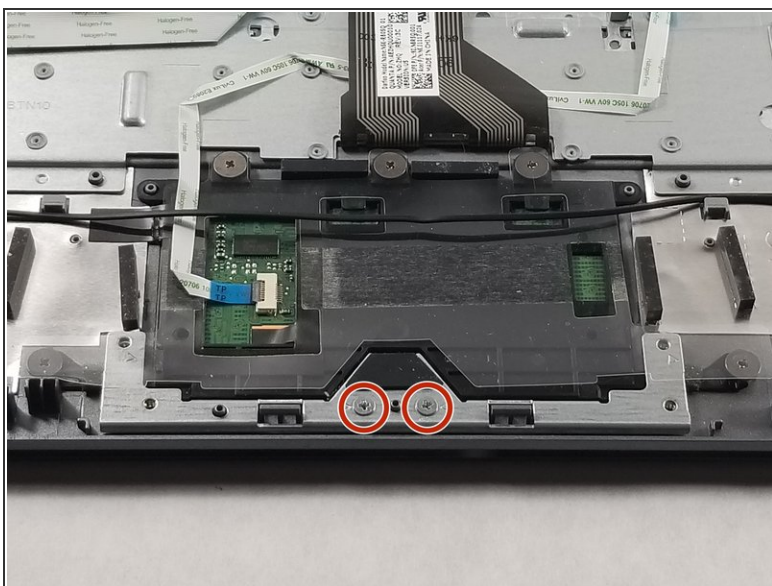

- Gently lift the battery up and away from the hooks on the bottom of the device keeping the battery in place.
- ⚠ Be sure the battery is away from the clips before pulling away so as not to break the clips.

Step 4

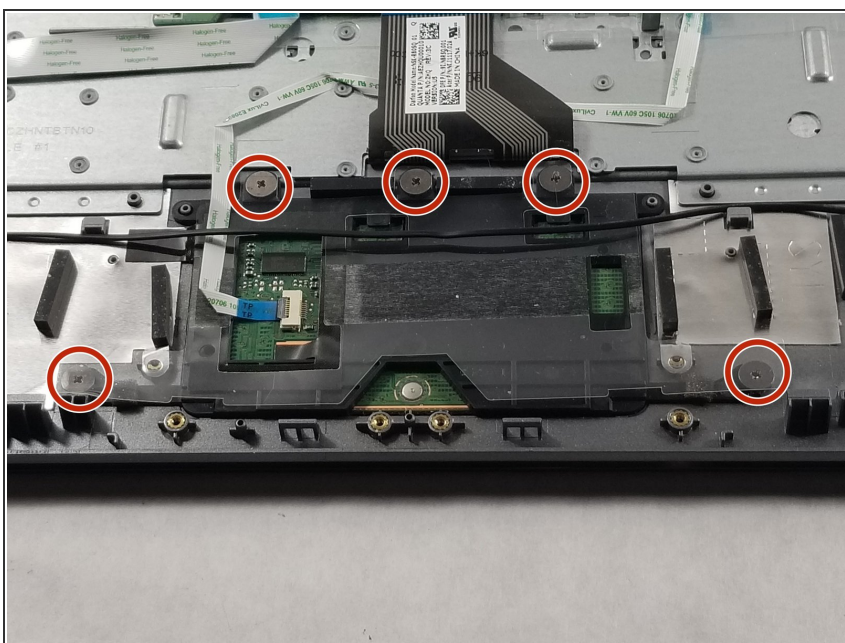

- Detach the connecting cable from the motherboard by pulling away.
- Remove the battery from the device.

Step 5 — Touchpad

- Unscrew the two screws on the silver restraint with the Phillips #0 screwdriver.
- Lift the silver restraint from the device.

Step 6

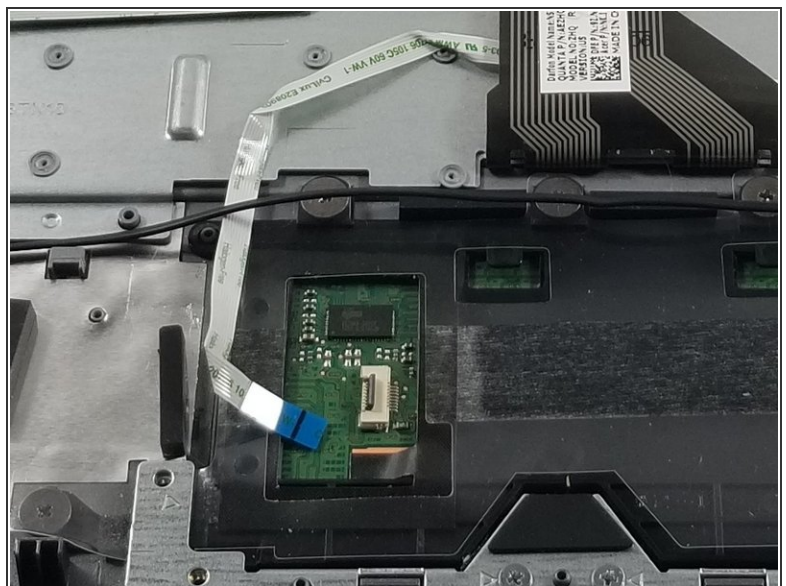

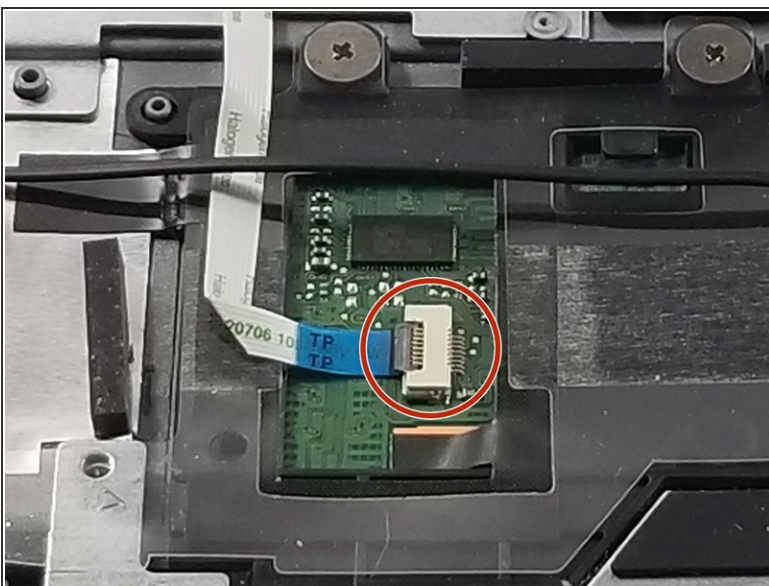

- Unscrew the five screws on the touchpad.
- ⓘ You will need to move aside the plastic covering that is above each screw.

Step 7

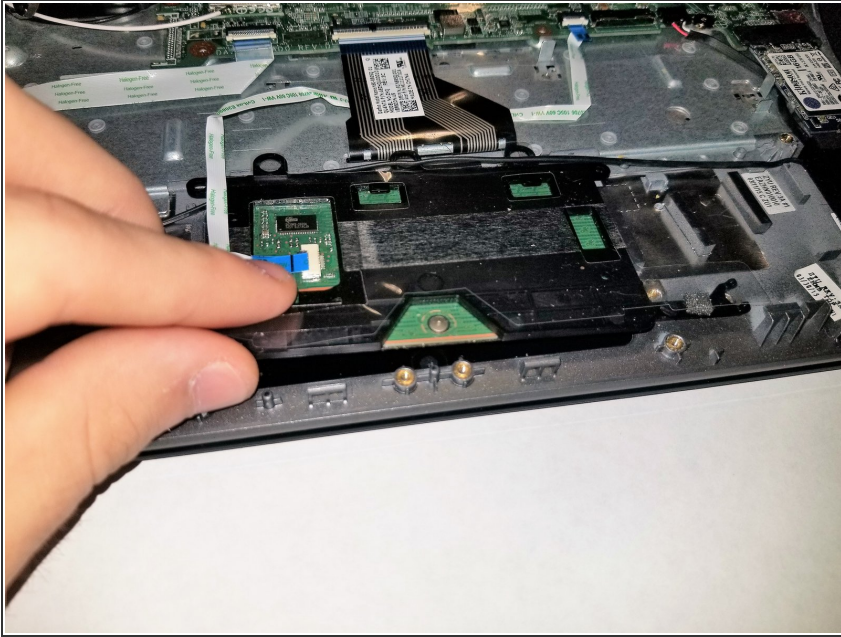

- Using a spudger, lift the black electrical tape to the left of the touchpad.
 - Remove the black wire running across the touchpad from the two hooks on top of the part.
- ⚠ Be careful not to damage the black wire when removing from the two hooks.

Step 8

- Lift the flap on the wire connecting the motherboard and remove the connector.

Step 9

- Remove the touchpad from the device.

To reassemble your device, follow these instructions in reverse order.
