INTRODUCTION

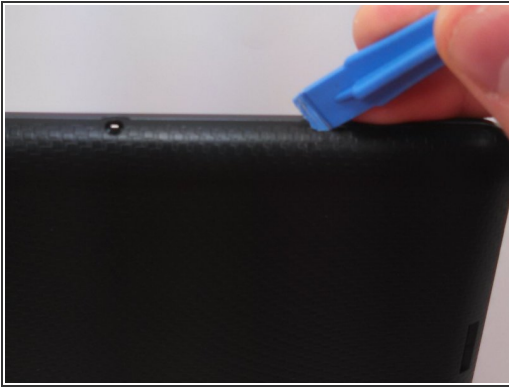

In this guide you will remove the rear cover in order to access internal components.

TOOLS:

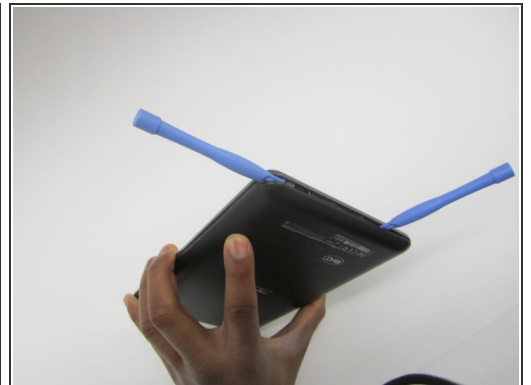

- [iFixit Opening Tools](#) (2)
-

Step 1 — Rear Case

- Insert a plastic opening tool into a gap near the charging port at the top of the device. Slide the tool in either direction along the device.

Step 2

- Slide the tool along until you have completely separated the rear cover.
- If needed, place the first tool in the gap created to hold this gap open and use a second tool to pry the remaining portion of the rear cover off.

Step 3

- Once all the sides have been separated, you should be able to simply lift the cover off of the device.

To reassemble your device, follow these instructions in reverse order.
