-

Step 1 — Battery

⚠ Make sure the device is powered off.

- Open media port cover at the top of the tablet.
- Use the Phillips #00 screwdriver to remove the 1 mm screw.

Step 2

- Using the metal spudger, carefully pry open the back cover.

Step 3

- Remove small section of grey tape.

Step 4

- Unplug the connection cord from the motherboard.

Step 5

- Try to remove the battery by pulling on the blue tabs.
 - If unsuccessful, use the black plastic spudger to gently break the glue bonds underneath and pull up to remove the battery.
- ⚠ Be very cautious not to puncture or bend the battery.

Step 6 — Motherboard

- Remove all of the tape surrounding the motherboard.

Step 7

- Starting with the 2 large connections use the plastic opening tool to gently pry on the connections and pop them out.
- Now, disconnect the two smaller black and red cords from the motherboard.

Step 8

- Scrape away the small square sticker to reveal one small screw. Use the Phillips #00 screwdriver to remove the screw.
- Using the same screwdriver remove the other three screws on the motherboard.

Step 9

- Using the small plastic tool, carefully pry the motherboard out of the device.

To reassemble your device, follow these instructions in reverse order.
