### TOOLS:

- [Tweezers](#) (1)

Angled

- [iFixit Opening Tools](#) (1)
-

## Step 1 — Back Cover

 Turn off your device before opening it.

- Use a plastic opening tool to carefully separate the back cover, starting at the volume buttons.
- Continue separating the back cover along the short side closest to the camera and around the device.

## Step 2

- When separated enough, a little more than halfway around the device, the back cover will be easy to take off.

### Step 3 — Charging Port

- Remove any tape covering the black, braided cable connecting the charging port to the motherboard.

### Step 4

⚠ In the next step, be careful not to squeeze too hard or scratch the motherboard.

- Use the angled tweezers to disconnect the motherboard-battery cable from the white connector in the middle of the side opposite the docking port.

## Step 5

 In the next step, be careful not to squeeze too hard or scratch the motherboard.

- Use the angled tweezers to disconnect the cable with red wires from the beige connector in the middle of the side opposite the docking port.

## Step 6

 The port may be taped from underneath and need a bit of force to take out.

- Use the angled tweezers to carefully remove the charging port, which is in the corner opposite the device's Micro-HDMI port.

To reassemble your device, follow these instructions in reverse order.
