

Alcatel IdealXCITE Rear Speaker Replacement

How to replace the antenna in an Alcatel IdealXCITE.

Written By: Franklin Froehlich

INTRODUCTION

If you need to replace the rear speaker in your Alcatel IdealXCITE, you should use the following guide.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Spudger](#) (1)
 - [Jimmy](#) (1)
 - [iFixit Opening Picks set of 6](#) (1)
-

Step 1 — Battery

- Place your finger in the small notch on the left corner of the phone.
- Use your finger to gently pull up on the back cover where the notch is located.
- Gently pull up on the back cover, working around the phone.
- Remove the cover from the phone, and set it aside for later installation.

Step 2

- Place your thumb in the small notch between the battery and the phone.
 - Use your thumb to gently pry the battery up at the notch, releasing it from the phone.
- 📌 Take note of the contacts in the phone and on the battery for reinstallation.

Step 3 — Antenna

- Remove the four 4mm PH00 screws.

Step 4

- Using a spudger, pry upwards in the indentation on the bottom right corner of the phone.
- Work the tool gently around the antenna to release it.

Step 5 — Rear Speaker

- Remove the three 4mm PH00 screws holding the WiFi/GPS antenna in.
- Gently pry the WiFi/GPS antenna out using a Jimmy and set aside.

Step 6

- Remove the three remaining 4mm PH00 screws.
- Remove the two 3mm PH00 screws.

Step 7

- Using a spudger and an iFixit opening pick, pry the midframe up.

Step 8

- Pry gently between the rear case and speaker using an iFixit opening pick.

- ☑ Reapply adhesive to the new speaker when reassembling the phone.

To reassemble your device, follow these instructions in reverse order.
