INTRODUCTION

One of the causes for a blank or pix-elated screen could because it is cracked. In this guide, we will show you how to replace your screen.
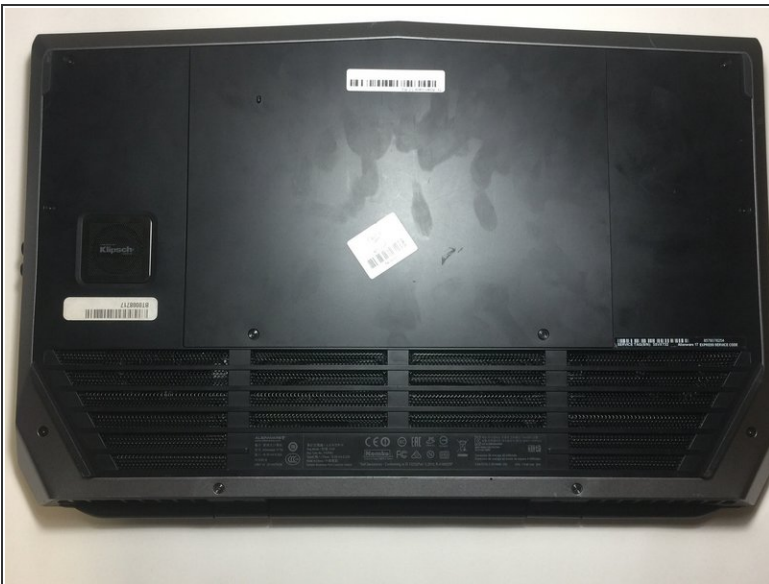

🔧 TOOLS:
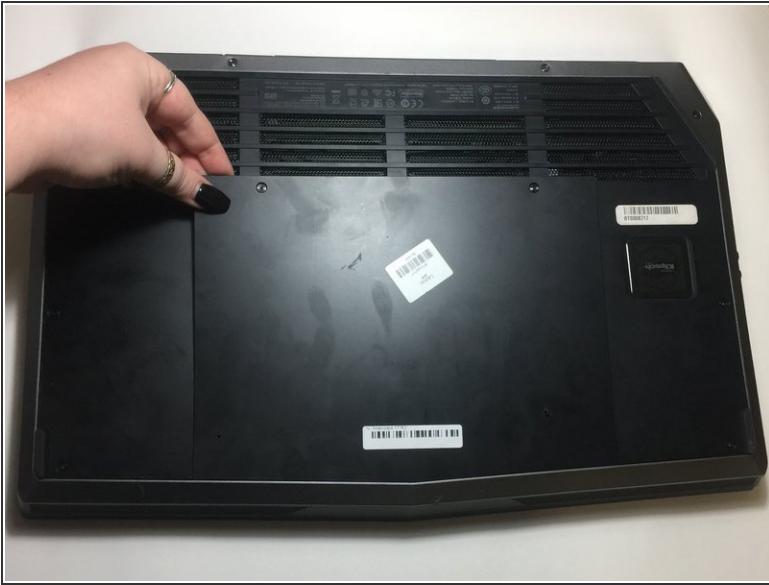

- Phillips #0 Screwdriver (1)

Step 1 — Display

- Put the laptop on a hard surface.

- Make sure that the Alienware is not plugged into any power source.

- First, we need to unplug the battery.

Step 2

- To unplug the battery, turn the computer upside down.

- Remove the two 4mm screws from the plastic covering protecting the inner part of the laptop.
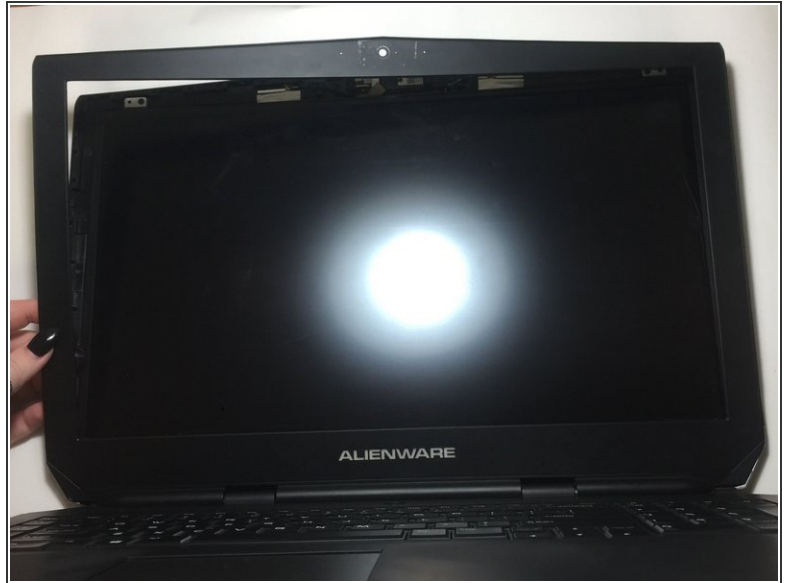

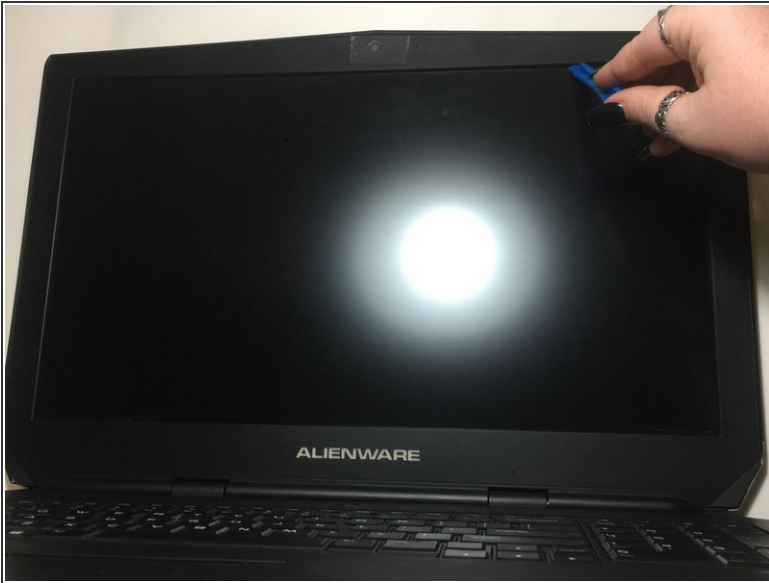

Step 3

- Gently, pull the cover up and slide it off.

Step 4

- Now, you are going to look for a yellow tag.

- Unplug the black wire that has the yellow tag.

- This with successfully disconnect your battery.

Step 5

- Using the plastic opening tool, gently remove the black plastic casing from the LCD screen.

- Run the opening tool along the inner side of the computer where the screen and the plastic covering meet.
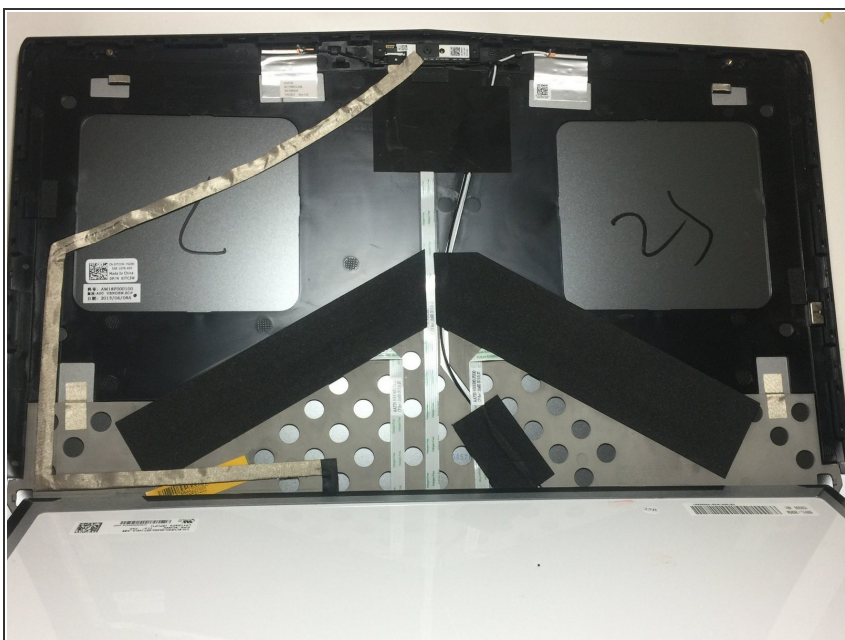

Step 6

- No you will unscrew the 2mm screws on the top and bottom side of the screen.

Step 7

- Tilt the screen forward towards the keyboard.
- Disconnect the plug that is connecting the screen to the main body.

Step 8

- Gently, lift the display away from the laptop.

To reassemble your device, follow these instructions in reverse order.
