

Alienware 17 R2 Hard Drive Replacement

This guide will show you how to replace your Hard Drive.

Written By: Luis Garcia

INTRODUCTION

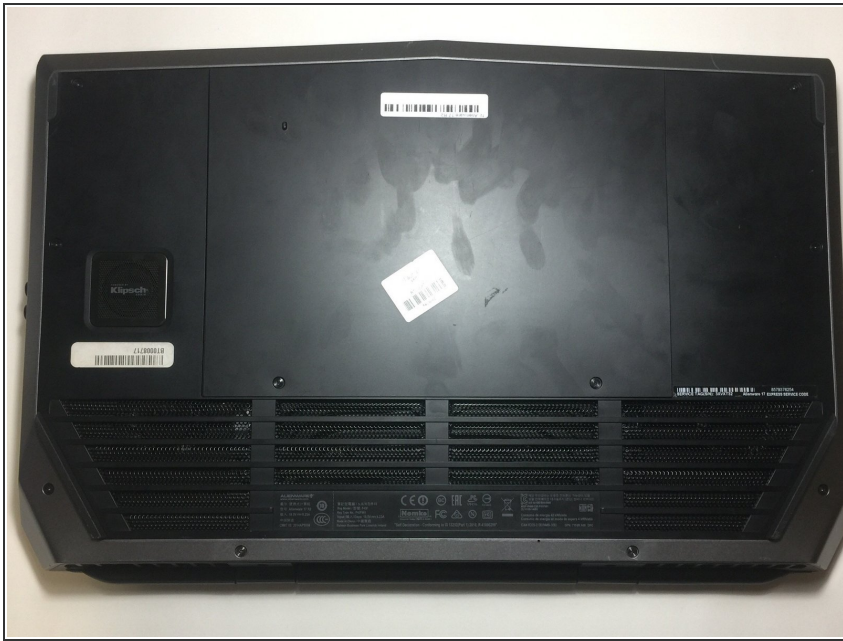

This guide will show you how to replace your Hard Drive.

TOOLS:

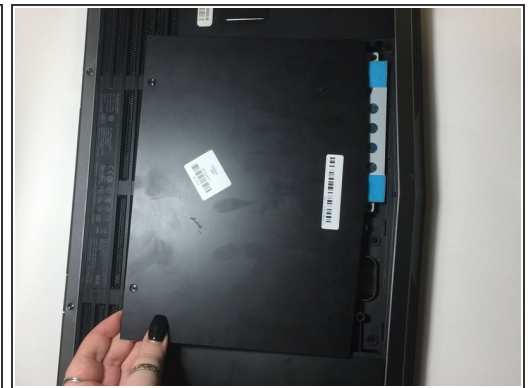

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Hard Drive

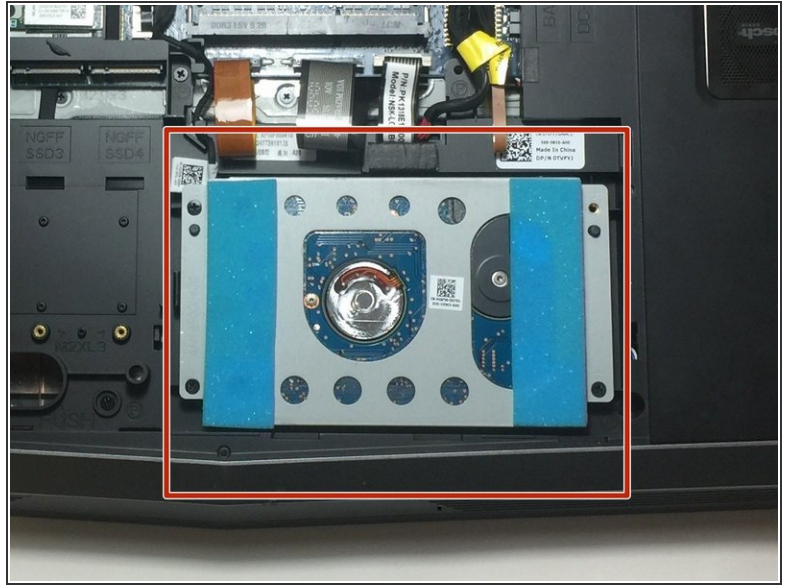

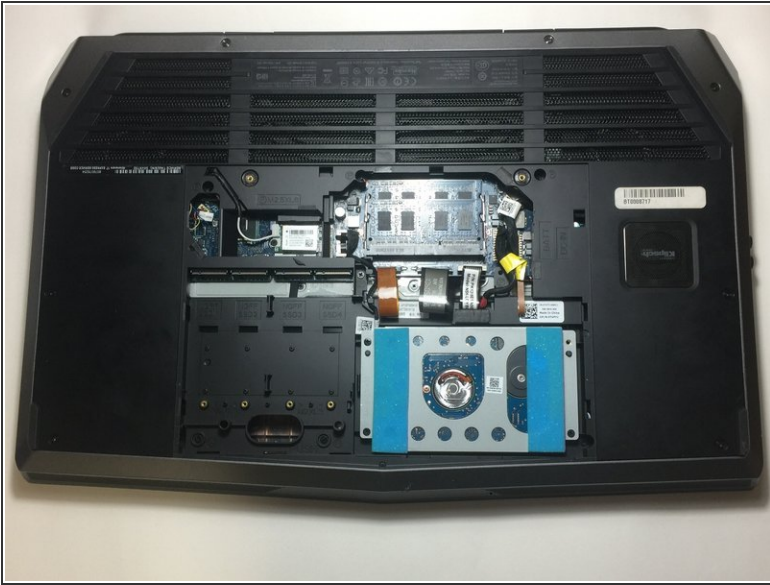

- Make sure the laptop is unplugged from any power source.
- Put the laptop facing down on a hard surface.

Step 2

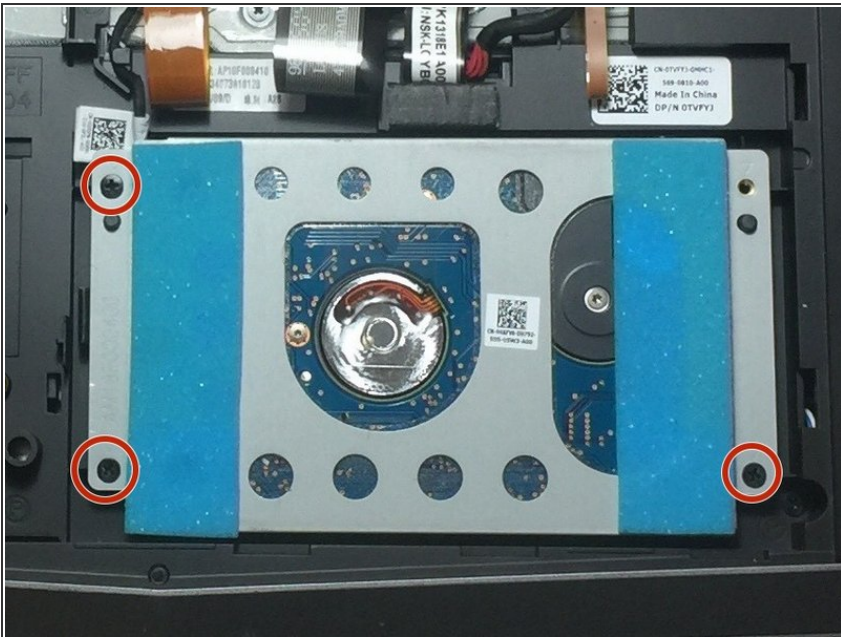

- Unscrew the two 6mm screws on the bottom side of the laptop.
- Lift up the back cover and slide towards you.

Step 3

- Locate the Hard Drive

Step 4

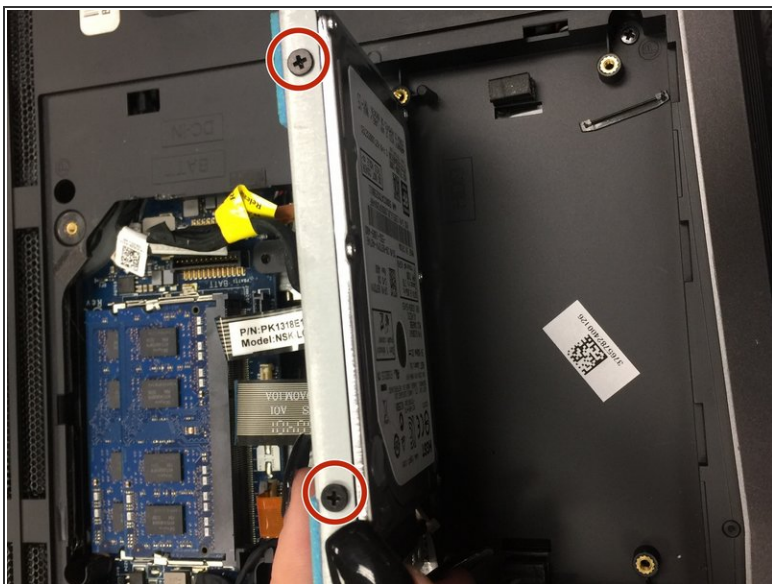

- Remove the screws that connect the SSD Bay to the laptop

Step 5

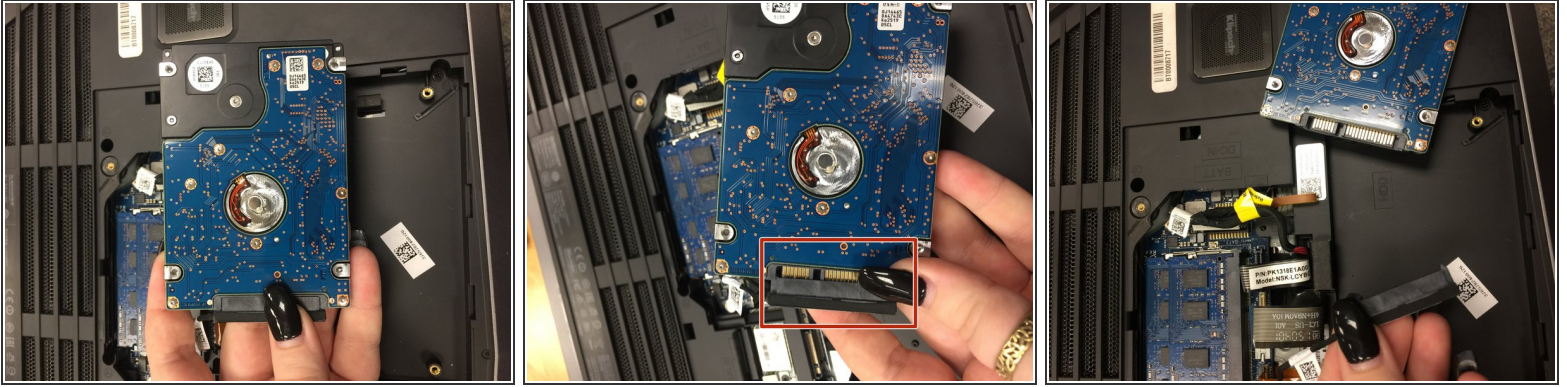

- Unscrew the three screws holding the hard drive

Step 6

- Unscrew the four screws on the long sides of the hard drive casing

Step 7

- Now that the hard drive casing is off, carefully unplug the hard drive from the laptop
- Your hard drive has now been successfully removed from your device

To reassemble your device, follow these instructions in reverse order.
