## INTRODUCTION

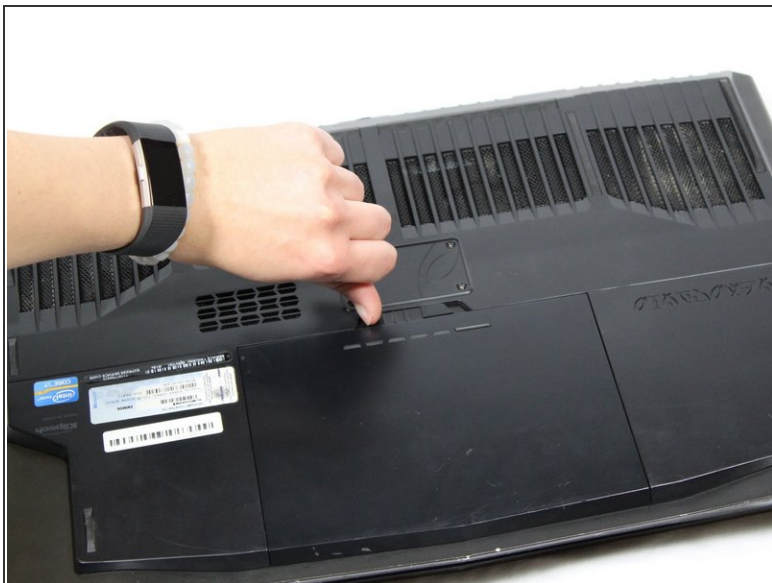

This guide shows how to replace the RAM in an Alienware M18x laptop.

### TOOLS:

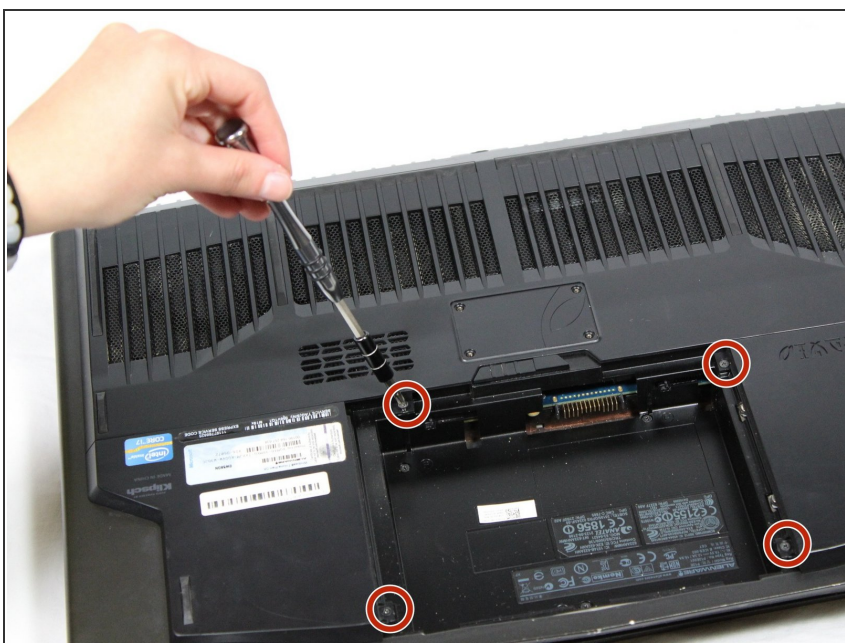

- [JIS #000 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — RAM

- Turn your computer over.
- Slide the bar over and lift the battery out.

## Step 2

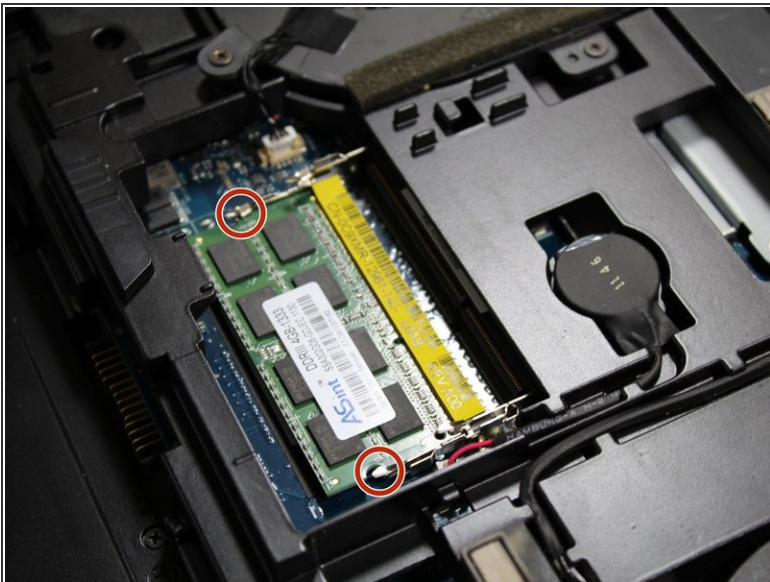

- Unscrew four screws with a J000 screwdriver.

## Step 3

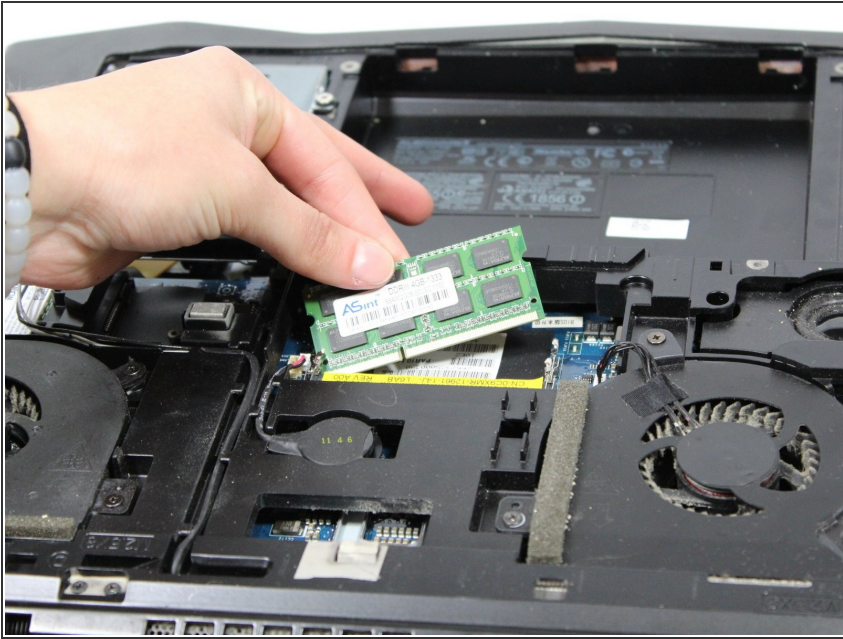

- Use the plastic pryer tool to lift the bottom cover off.

## Step 4

- Push outwards on the two silver tabs on either side of the RAM.

## Step 5

- Pull out the RAM card.

To reassemble your device, follow these instructions in reverse order.
