

Altec Lansing Mini Lifejacket 2 Battery Replacement

This step-by-step guide will show you how to replace the battery in your Altec Lansing Mini Lifejacket 2.

Written By: Stephen Albrecht

INTRODUCTION

If the battery in your Altec Lansing Mini Lifejacket 2 isn't holding a charge or is showing signs of failure, use this guide to replace it.

TOOLS:

- [Metal Spudger](#) (1)
 - [Phillips #2 Screwdriver](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
 - [Tweezers](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Back Panel

- Use the spudger to remove the eight black pins from the front and back of the wire screens.

Step 2

- Detach the eight secondary pins from the front and back of the wire mesh plates with a spudger.

 Removing the secondary pins from the rubber casing is optional.

Step 3

- Remove both black and orange layers from the speaker body.

Step 4

- Remove the single 7.8mm Phillips #2 screw from the mounting plate located under the device.
- Slide the mounting plate out to remove it.

Step 5

- Pry off the wire mesh on both sides using a metal spudger.

⚠ Be gentle to avoid bending the mesh.

Step 6

- Using tweezers, remove the four rubber stoppers in each corner of the rear panel.

Step 7

- Remove the four 13.7mm Phillips #1 screws located underneath the rubber stoppers.

Step 8

- Pull the case apart to access the interior components.

Step 9

- To remove the back panel, gently pull out its wire harness.

Step 10 — Battery

- Disconnect the battery from the motherboard.
- ⓘ The battery is not secured within the case and can be removed after detaching its wiring from the circuit board.

To reassemble your device, follow these instructions in reverse order.
