## Step 1 — Motherboard

- Use a Triangle #2 screwdriver to remove the six 10 mm screws from the back of the controller.

## Step 2

- Pry the two shell pieces from one another from the top orientation with a plastic opening tool.
- ⓘ The weights will fall out.

### Step 3

- Disconnect the battery terminal wires and the play, pause, and stop wires from the motherboard.

### Step 4

- Use a J1 screwdriver to unscrew the four 7 mm screws from the motherboard.

## Step 5

- Lift the motherboard out of the controller casing.

## Step 6 — Outer Shell

- Use a JIS #0 screwdriver to remove the two 7 mm screws from the retaining bracket that secures the play, stop, and pause button wiring.

## Step 7

- Use a JIS #0 screwdriver to unscrew the 5 mm screws from the LED indicator assembly.

## Step 8

- Slide out the triggers and bumpers.

To reassemble your device, follow these instructions in reverse order.
