

# Amazon Fire Phone Rear Facing Camera Replacement

Describes how to replace the rear facing camera.

Written By: Grayson Starr

## INTRODUCTION

Use this guide to replace the rear facing camera located on the back panel of the phone.

### TOOLS:

- [T3 Torx Screwdriver \(1\)](#)
- [iFixit Opening Picks set of 6 \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Anti-Static Project Tray \(1\)](#)
- [Suction Handle \(1\)](#)
- [JIS Driver Set \(1\)](#)

## Step 1 — Battery

- ⓘ If the display is damaged use clear packing tape to contain any glass shards.
- ⓘ Make sure the entire surface of the display is covered with tape.
- ! Wear safety glasses to protect your eyes.

## Step 2

- Power off your phone.
- Remove the SIM card from the left side of the phone by pressing the small hole and allowing it to eject using the 0.8 screwdriver head.
- Remove the two 4mm screws on the bottom of the phone using the Torx T3 screwdriver.

## Step 3

- Press the small suction cup just above the home button.
- While lifting up on the suction cup insert an opening pick into the crevice between the screen and back casing to pry the screen off carefully.

**⚠** Carefully separate the two halves to avoid tearing the volume rocker ribbon cable.

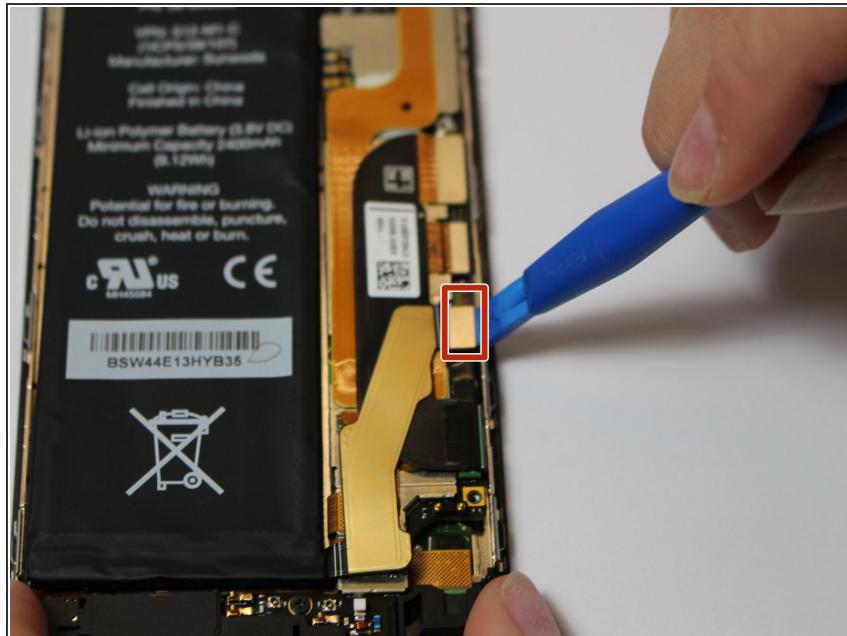

- Using the opening tool, disconnect the volume rocker ribbon cable from the base of the phone freeing the two halves of the phone.

## Step 4

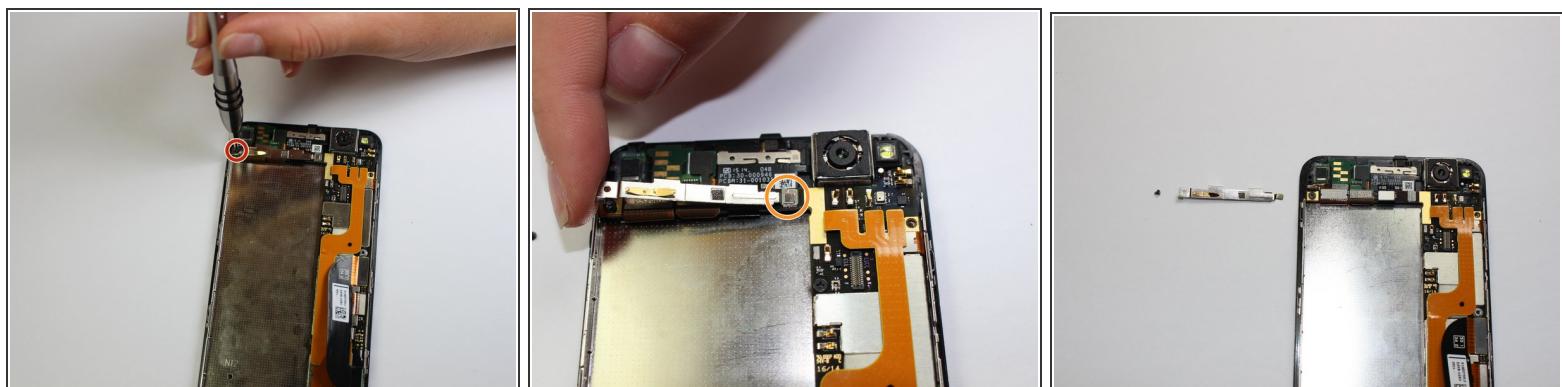

- Using the J000 screwdriver head, remove the three 3mm screws holding the bracket in place.
- Remove the silver bracket that was held into place by the three screws just removed.

## Step 5

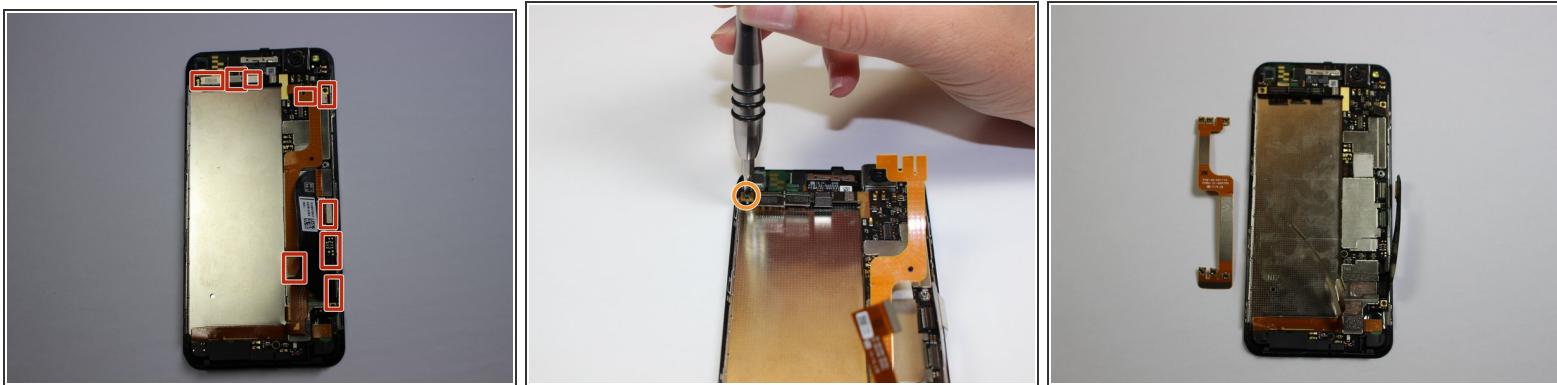

- Disconnect the battery connection cable by using the plastic opening tool and applying light pressure upwards on the cable.

## Step 6 — Rear Facing Camera

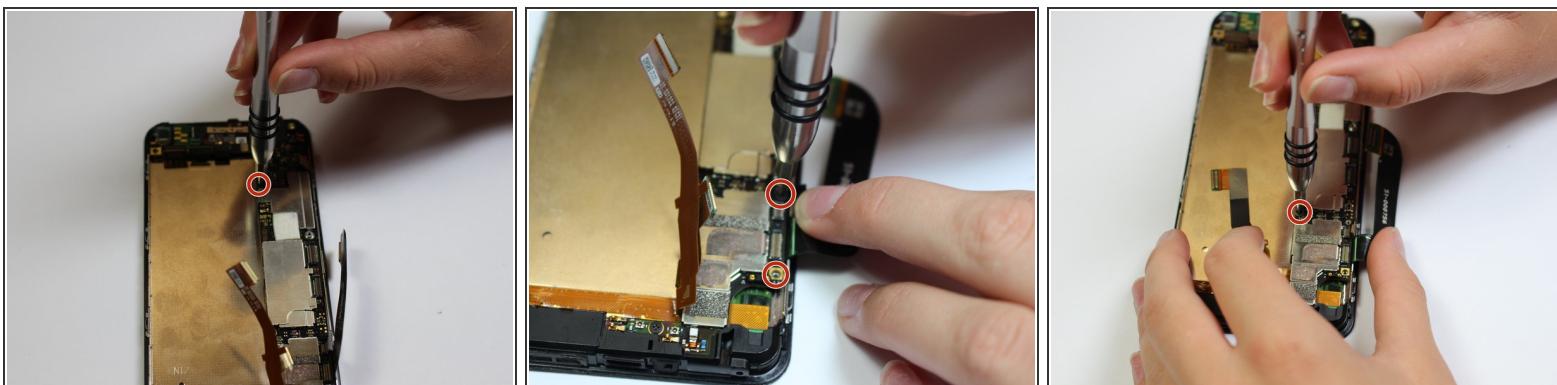

- Unscrew the one 1mm standoff screws holding the bracket in place along the top of the phone.
- Carefully slide the bracket out of the tap and then maneuver the bracket off slowly.

## Step 7

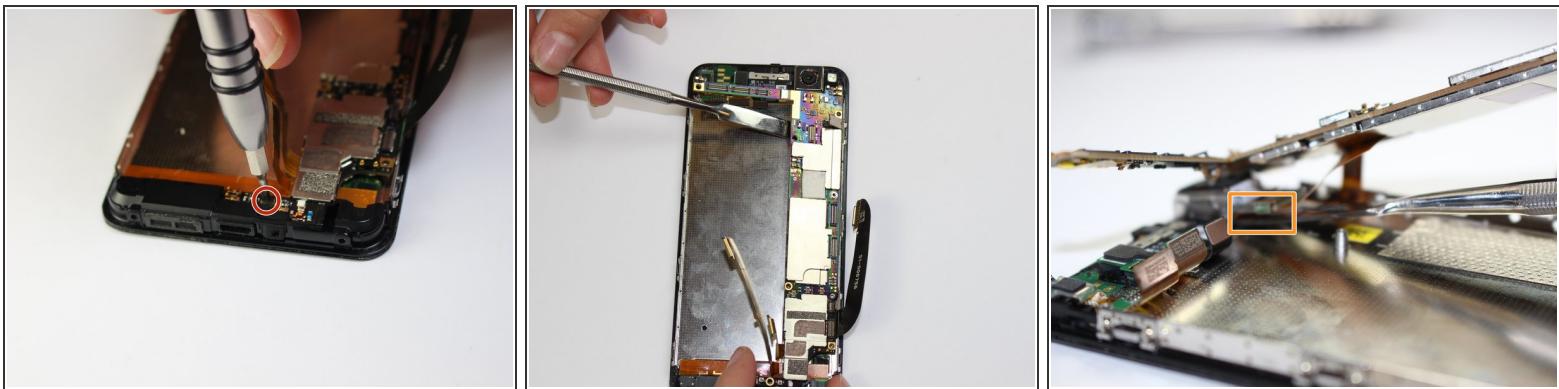

- Disconnect the 9 cables along the top and right side of motherboard using a spudger.
- Unscrew the 3mm screw located on the top left side of the phone with a flat head.
- Disconnect the cable in order to expose the 5 screws along the right hand side of the motherboard.

## Step 8

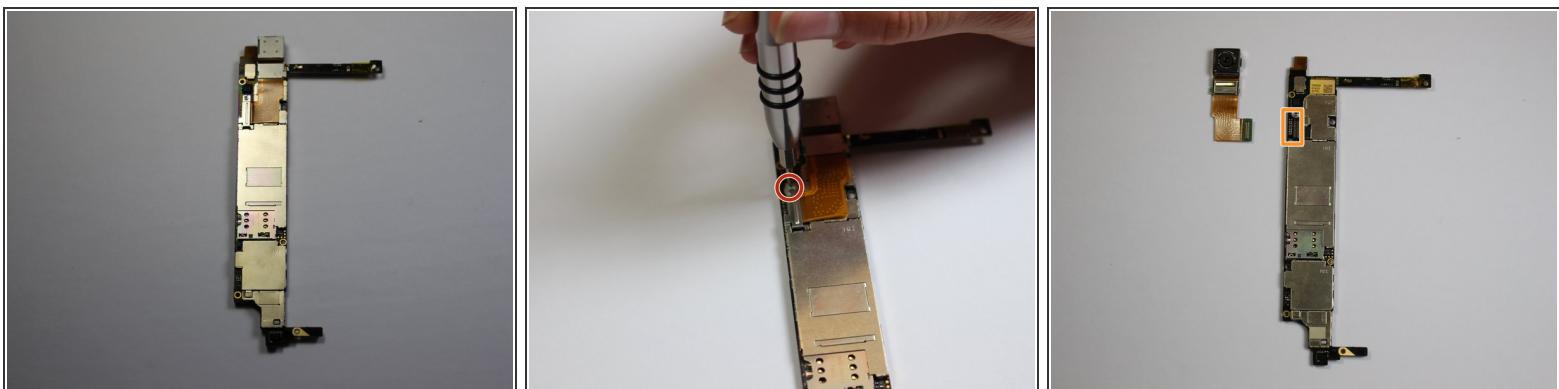

- Unscrew four 2mm screws to remove the motherboard.

## Step 9

- Unscrew the remaining 2 mm screw to remove the motherboard.
- Carefully lift up the motherboard and use the spudger to pry the camera from the camera holder.
- Lift off the bottom plastic piece with flat antenna cables.

## Step 10

- Flip the motherboard over.
- Using a philips head screwdriver to remove the remaining 1mm screw holding the bracket that is protecting the camera ribbon cable.
- Remove the ribbon cable and rear facing camera carefully.

To reassemble your device, follow these instructions in reverse order.
