TOOLS:

- [T10 Torx Screwdriver](#) (1)
 - [Jimmy](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Final Thoughts

REPAIRABILITY SCORE:

- The majority of the device is held together by standard Torx screws.
- The device construction is simple and straightforward to disassemble.
- Antenna cables are soldered to the heat sink and the connectors are hidden behind a plastic frame. The potential for ripping one of these cables is high if you are not careful during disassembly.
- All the ports are soldered to the motherboard.
