

Apple iPod Hi-Fi Grille Replacement

How to replace an Apple iPod Hi-Fi grille.

Written By: Timothy Scheuermann

INTRODUCTION

This guide details how to replace the front grille of the Apple iPod Hi-Fi speaker system.

TOOLS:

- [Hair Dryer](#) (1)
- [Metal Spudger Set](#) (1)

Step 1 — Grille

- Warm up the glue by using the hair dryer on the grille for 5-10 minutes.

(i) You can skip this step if you don't have access to a hair dryer. However, if you skip this step, the next step will take longer and will be harder.

Step 2

- Take one spudger and fit it under the grille.
- Use your first spudger to pry up and make room to insert a second one.
- Sever the glue connections between the grille and the device by moving one spudger around, cutting through the glue.
- Use the other spudger to raise the grille, allowing you to see where you're working.

 Since you're cutting the glue, the grille may not stick as well when reassembled.

Step 3

- Pull the grille off the Apple iPod Hi-Fi with your hands.

To reassemble your device, follow these instructions in reverse order.
