ArmorAll AA255 Switch Replacement

Power switch replacement for the ArmorAll AA255.

Written By: Renzo La Rosa

INTRODUCTION

Make sure the cord is unplugged.

🔧 TOOLS:

- Long shaft Phillips #2 Screwdriver (1)
- T20 Torx Screwdriver (1)
- iFixit Opening Tools (1)
- Spudger (1)

Step 1 — Lower Motor Housing

- Remove the orange main housing unit from the vacuum bucket by pulling outward on the handle tabs while lifting upward as shown.

Step 2

- Remove the five 15mm PH2 screws.

Step 3

- Remove the 15 mm T20 screw. This screw is located nearest the power cord.

Step 4

- Gently separate the upper and lower sections of the main housing.

Step 5 — Switch

- Using a PH2 screw head, unscrew the two 15mm screws as shown.

Step 6

- Pull the black handle.

- Using a PH2 screwdriver, unscrew the single 12mm screw shown.

Step 7

- Use the blue opening tool to open up the black handle.

Step 8

- Using your fingers, gently take out the black cords.

- (i) Careful to not break the black cords.

Step 9

- Using the spudger, take out the switch. Do this by pushing the spudger against the switch on both sides as shown and then pull the switch out.

Step 10

- Replace the switch shown.

To reassemble your device, follow these instructions in reverse order.
