

Astro A20 Frame Replacement

Astro A20 Frame Replacement will be showing the steps on how to replace a damaged frame.

Written By: Jasmine Yarbrough

INTRODUCTION

A damaged frame on an Astro A20 can be replaced easily with a 60 mm extension, Phillips #1 screwdriver, and a new frame.

TOOLS:

- Phillips #1 Screwdriver (1)

Step 1 — Frame

- Place your hand on the back of the speaker.

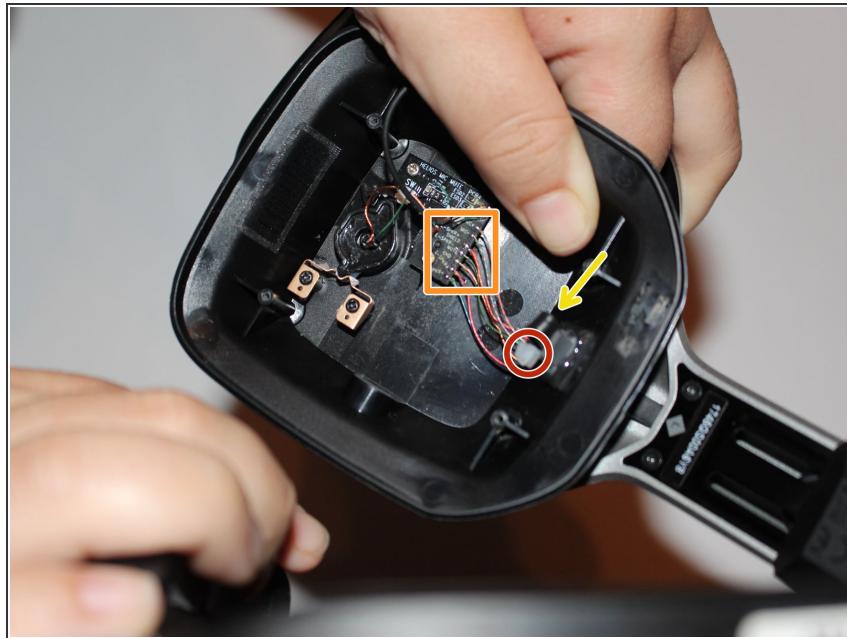

Step 2

- Remove the four 7mm screws with a Phillips #1 screwdriver.

(i) You may want to use a 60mm screwdriver extension to reach the screws inside of the headset.

Step 3

- Lift the speaker.
- Disconnect the white connector from the device.
- Remove the wires connecting the frame shown by the yellow square.
- Pull the black cord through the hole shown by the blue arrow.

Step 4

- Find the top 7mm J1 JIS head screws.
- Remove the two 7mm J1 JIS head screws with a J1 screwdriver bit connected to a 60mm extension.
- Pull the black cord through the frame.

To reassemble your device, follow these instructions in reverse order.
