Step 1 — Cushion

- Place one hand on the hard side of the headset ear portion and on the cushion.

- Lift the small portion on the edge of the cushion.

Step 2

- Slide the metal spudger underneath the lift part of the ear cushion.

- Pull the ear cushion while wedging the spudge around the edge of the ear cushion.

Step 3

- Remove the ear cushion from the headset.

Step 4 — Battery

- Place hand on the opposite side of the speaker.
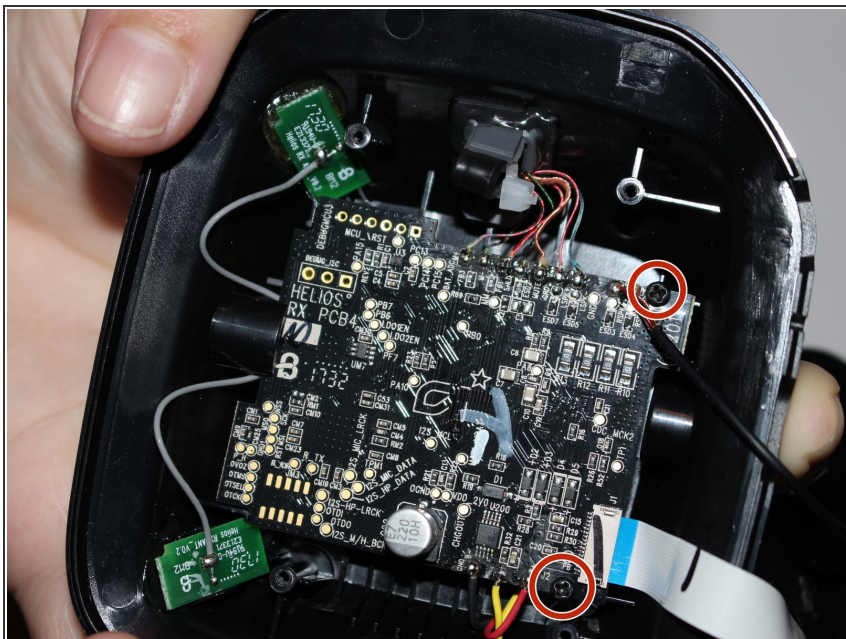

Step 5

- Remove the four 7mm screws with a Phillips #1 screwdriver.

- (i) You may want to use a 60mm screwdriver extension to reach the screws inside of the headset.

Step 6

- Lift and remove the speaker from the headset.

Step 7

- Remove the two 7mm screws with a Phillips #1 screwdriver.

Step 8

- Lift the motherboard to expose the battery.
