Step 1 — Removing the Back Cover

- Remove the eight 9.0 mm Phillips screws along the perimeter of the case.

- Remove the three 6.0 mm Phillips screws from the center of the case.

Step 2 — Taking off the Keyboard

- Slide the Jimmy in between the keyboard and underside of the laptop to remove the keyboard.

- Leave the keyboard face down on the screen.

⚠ Do not pull the keyboard away from the laptop. The keyboard will still be attached with wires.

Step 3 — Detaching keyboard

- Use a nylon spudger to lift the latch on each wire jack and detach the keyboard wires.

- After the tabs have been lifted, the wire can be gently pulled out by hand.

- Set the keyboard aside.

Step 4 — Removing the battery

- Remove the six 6.0mm Phillips screws on the battery.

- Remove the wire jack from the battery. Use a nylon spudger to lift the latch.

- Remove the battery from the device.
