

# Asus Chromebook C300MA-DH02 Battery Replacement

This guide will show you how to replace your old battery with a brand new one.

Written By: Zachary Leonard

## INTRODUCTION

The battery is responsible for supplying power to the computer when the power adapter is not being used. You should get 10-11 hours of run-time with your battery. If the time is significantly shorter you should replace the battery even if it hasn't failed.

### TOOLS:

- [Phillips #000 Screwdriver](#) (1)
- [Spudger](#) (1)
- [iFixit Opening Tools](#) (1)

### PARTS:

- [Asus Chromebook C300MA-DH02 Battery](#) (1)

## Step 1 — Keyboard Panel

- Flip the Chromebook over so that the underside is facing up.
- Using the Phillips PH #000 screwdriver, remove the 11 "4mm" screws on the back of the device.

## Step 2

- Wedge the plastic opening tool between the bottom cover of the laptop and the keyboard panel.
- Apply pressure and move the plastic opening tool around the border of the laptop until it pops out.

## Step 3

- Once the keyboard panel pops out, slowly move it upwards so that the keyboard connection is visible.
- Remove the keyboard connection from the motherboard by pulling it outwards from the connector.

## Step 4 — Battery

- Remove (6) six "4mm" screws that hold the battery using the Phillips #000 screwdriver.

## Step 5

- Placing two plastic opening tools on each side of the battery connector and gently pull with an even force on both sides of the connector until the connector pops out.

## Step 6

**i** Note: Your battery may have adhesive on the underside. If you cannot easily remove the battery you can use a hair dryer to evenly warm the glue.

- Remove the battery by applying even force on both sides.
- During reassembly, purchase of adhesive may be necessary.

To reassemble your device, follow these instructions in reverse order.
