INTRODUCTION

This will show you how to open the AiO and upgrade RAM or replace hardrive

🔧 TOOLS:
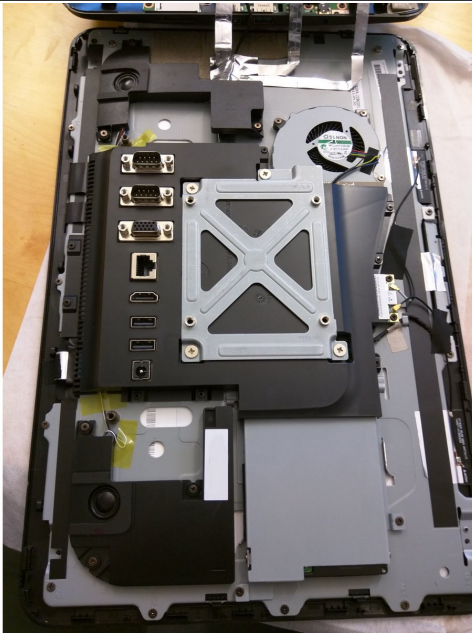

- Essential Electronics Toolkit (1)
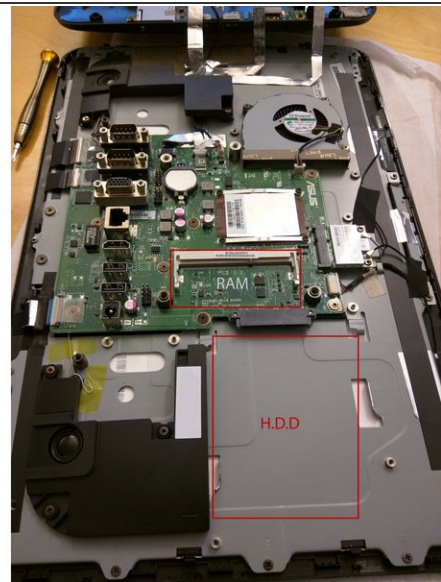

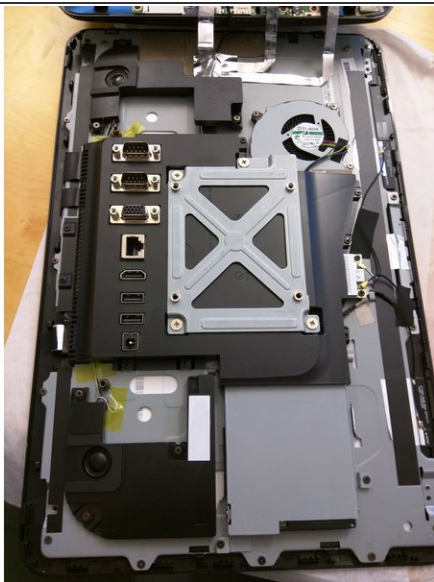

Step 1 — Removing Back Cover

- Remove screw cover plugs

- Remove the two screws

- Use prying tool/knife to remove rubber strip from the bottom

- unscrew five small screws

- User prying tool/knife to unsnap clips all around the edges

Step 2 — Replace Hard drive

- Remove the two screws holding hard drive

- Slide out and replace.

Step 3 — Getting to the memory enclosure

- Remove metal X which is the bracket or wall mount area.

To reassemble your device, follow these instructions in reverse order.
