# Asus G750JW-BBI7N05 RAM Replacement

Follow this guide to remove and replace RAM modules in your Asus G750JW-BBI7N05.

Written By: Stephanie Asling

INTRODUCTION

Faulty or failing RAM can cause a variety of issues, from random crashing to a total loss of power. This guide will walk you through locating and replacing your laptop's RAM.

🔧 TOOLS:

- iFixit Opening Tools (1)
- Phillips #00 Screwdriver (1)

Step 1 — Battery

- Power off and unplug your laptop, then turn it over.

Step 2

- Slide the battery release latch all the way to the right. This will cause the battery to "pop" out slightly.

Step 4 — RAM

- Lift up the rubber stopper on the backplate to expose one Phillips screw. Unscrew it until it becomes loose.

  ⚠ This screw is permanently connected to the backplate and cannot be removed. Unscrewing it only allows you to remove the backplate from the laptop.

  ⓘ The backpate is the plastic plate on the underside of the laptop that covers some of its easily accessible internal components.

Step 5

- Use an opening tool to pry up the backplate along its edges, then remove it.
  - ⓘ You may need to apply some force when prying up the backplate.
- 📌 Keep in mind: During reassembly, replace the backplate starting from the bottom.

Step 6

⚠ During the recycling process, this laptop lost some of its parts. In this step, its top two RAM modules are missing.

- Remove each RAM module one at a time by sliding them downward out of their slots.
