

Asus GL551JW-AH71 RAM Replacement

This guide outlines how to replace the RAM in the Asus GL551JW-AH71.

Written By: William Kelley

INTRODUCTION

This guide outlines how to replace the RAM in the Asus GL551JW-AH71.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Battery

- Close the device and lay it upside down.

⚠ Unplug the device and make sure the device is powered off before removing the battery.

Step 2

- Move the battery eject button to the right. The battery will be ejected.

Step 3

- Grab the battery and remove it from the device.

Step 4 — RAM

- Using a Phillips #00 screwdriver, remove the two 11mm screws that hold the access panel in place.

Step 5

- Remove the access panel by lifting it up.

Step 6

- Locate the tabs holding the RAM chip in place.
- Push the tabs in an outward direction from the RAM and the RAM will be released.
- Gently remove the RAM from the motherboard.

To reassemble your device, follow these instructions in reverse order.
