

# Asus K55VD Hard Drive Replacement

Users may refer to this guide if their hard drive is malfunctioning. Symptoms include screen freezing, weird noises, and the blue screen of death.

Written By: Raul Vides Sarmiento

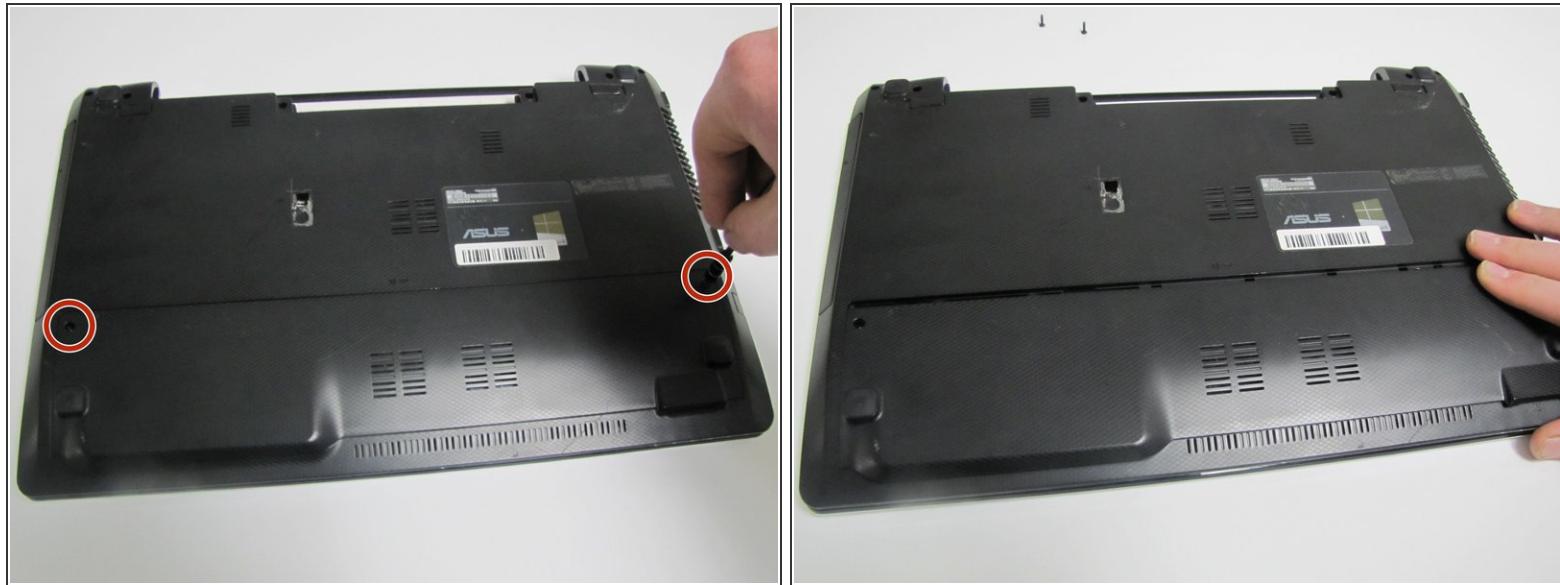

## INTRODUCTION

If your Asus K55VD has experienced sudden screen crashing, the blue screen of death, or abnormal noises within its system, then you must have a faulty hard drive. Before replacing the hard drive, make sure you save your data and completely turn the device off. Put each removed component into a safe location.

## TOOLS:

- Phillips #0 Screwdriver (1)

## Step 1 — Hard Drive

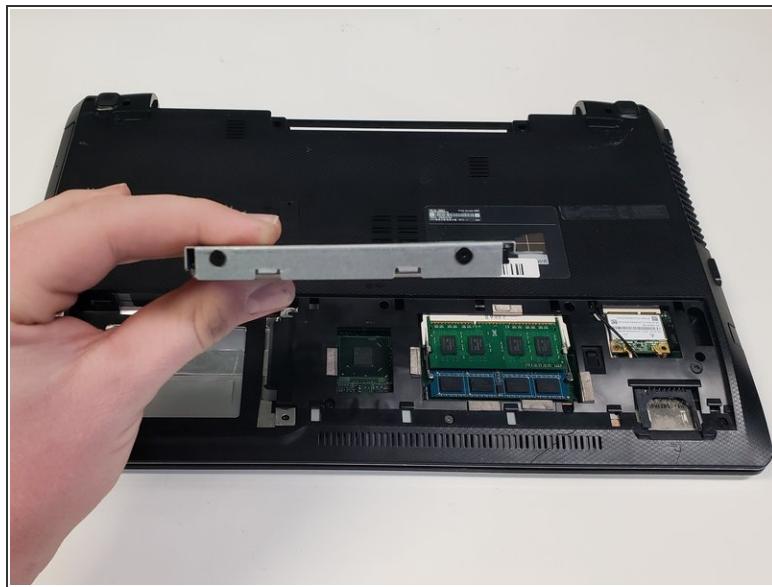

- Use a Phillips #0 screwdriver to remove the two 1.5 mm screws in the smaller portion of the bottom cover.
- After removing the screws, remove the smaller cover.

## Step 2

- Use a Phillips #0 screwdriver to remove the 1.5 mm screws that hold down the hard drive.

## Step 3

- Remove the hard drive from the slot.
- Remove the hard drive from its shell.

To reassemble your device, follow these instructions in reverse order.
