Step 3 — Battery Removal

- Remove the warning sticker that covers the battery plug and connecting cord.

- Look for the widest gap on either side of the battery. Using the plastic opening tool carefully lift battery out.

⚠️ The battery is held down with adhesive. Be careful not to damage battery or connecting cord.

- Disconnect battery connecting cord using tweezers.

Step 4 — Remove Internal Back Plate
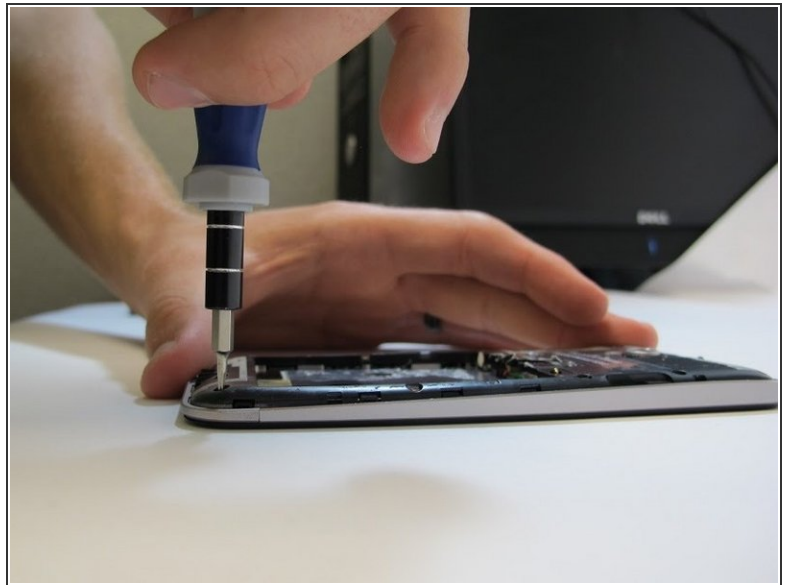

- Use T5 Torx screwdriver to remove 14 screws from internal back plate.

- ⓘ Use of magnetic pad will help with keeping track of screws.
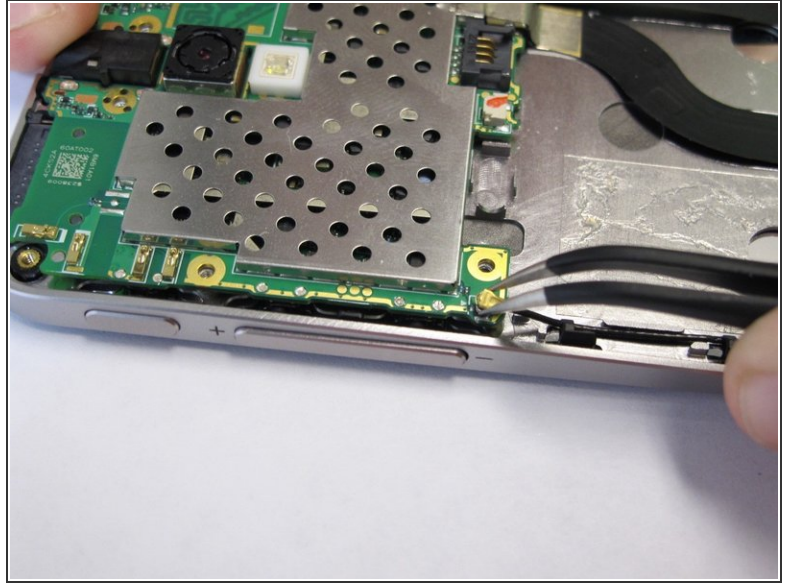

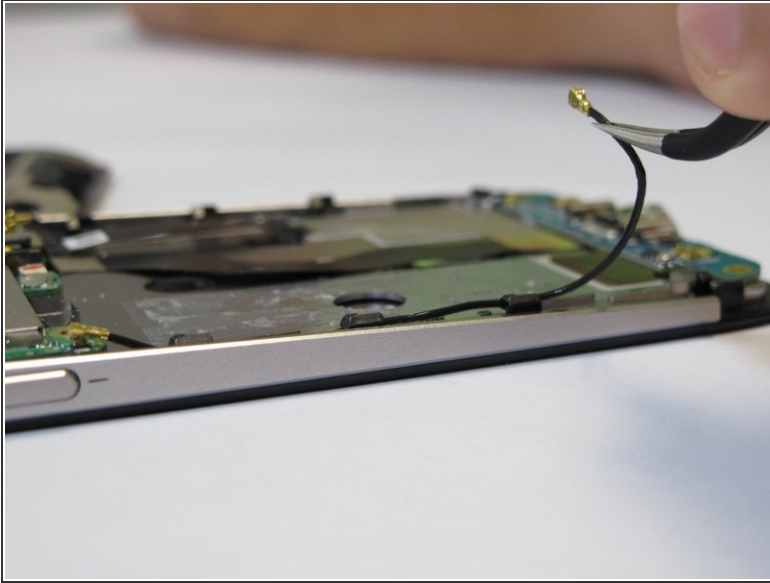

- Once screws are out, remove the plate.

Step 5 — Removal of A68 Sub Cables
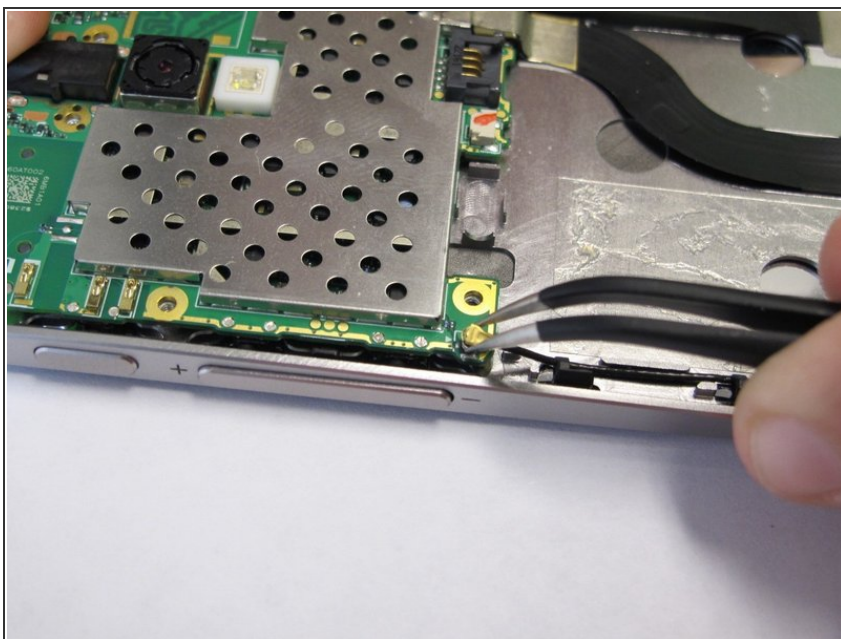

- Use tweezers to unplug the sub cables from the circuit board and housing.
