Step 3 — Battery Removal

- Remove the warning sticker that covers the battery plug and connecting cord.

- Look for the widest gap on either side of the battery. Using the plastic opening tool carefully lift battery out.

⚠️ The battery is held down with adhesive. Be careful not to damage battery or connecting cord.

- Disconnect battery connecting cord using tweezers.
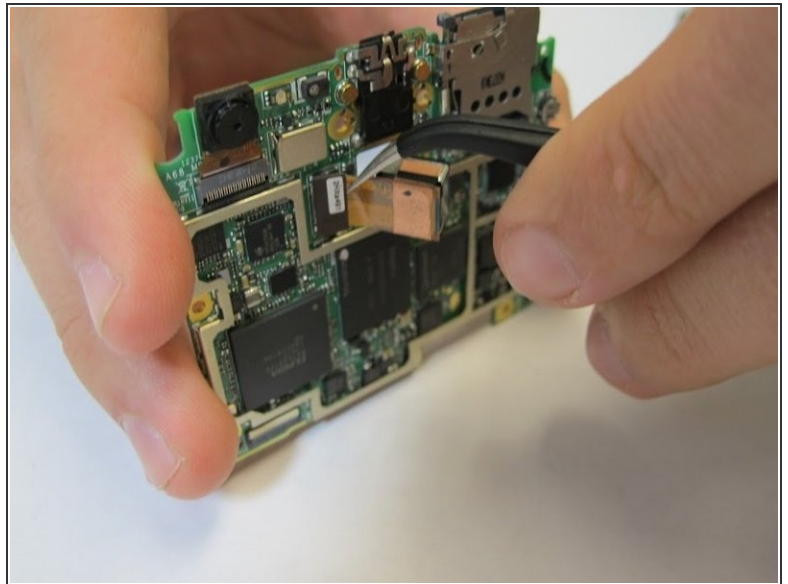

Step 4 — Remove Internal Back Plate

- Use T5 Torx screwdriver to remove 14 screws from internal back plate.

ⓘ Use of magnetic pad will help with keeping track of screws.

- Once screws are out, remove the plate.

Step 5 — Disconnect Motherboard

- Disconnect four plugs to the motherboard using tweezers.

- Lift up green motherboard.

Step 6 — Removing Camera

- Remove camera from back of the motherboard with tweezers.

To reassemble your device, follow these instructions in reverse order.
