INTRODUCTION

If your battery does not hold a charge or is having issues with battery life, it may need to be replaced. In this guide, we will show you how to replace the battery.

🔧 TOOLS:

- T4 Torx Screwdriver (1)
- Phillips #0 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Battery

- Use a T4 Torx screwdriver head to remove the ten 4mm Torx head screws on the bottom of the laptop.
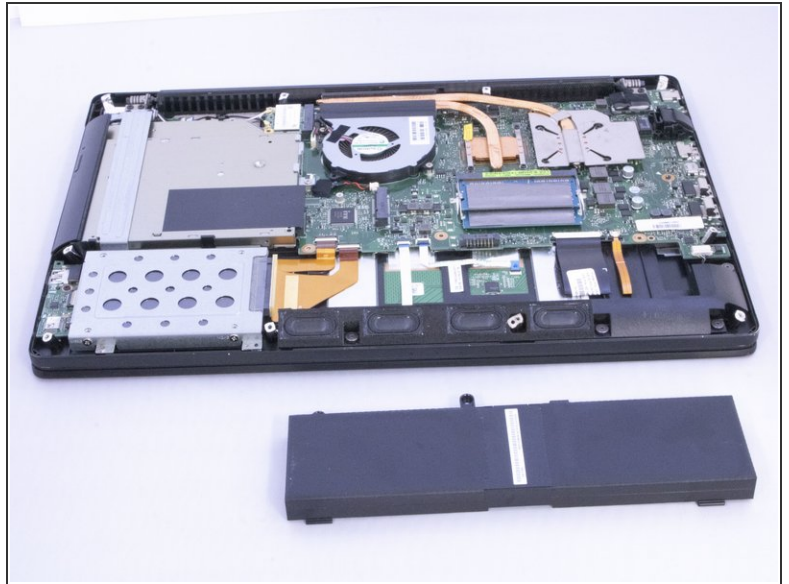

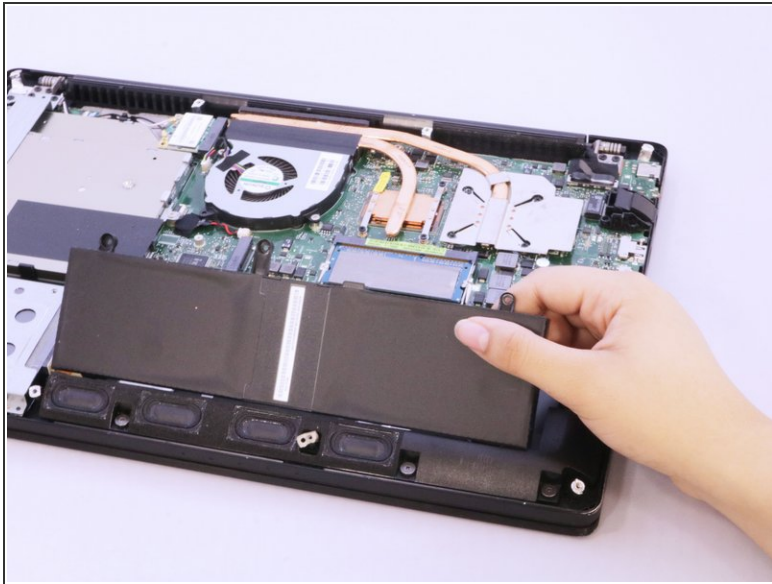

Step 2

- Use an opening tool to pry open the rear cover. Lift the cover off and away from the board.

Step 3

- Use a Phillips #0 screwdriver head to remove the three black 7mm Phillips head screws that hold the battery in place.

Step 4

- Once the screws have been removed, gently lift the battery out using your fingers.
