

Asus Q551LN-BBI7T09 Laptop Hard Drive Replacement

This guide will cover how to replace a hard drive in a Asus Q551LN-BBI7T09 laptop.

Written By: Thomas

INTRODUCTION

Hard drives (HDs) and solid-state drives (SSDs) can run out of space, run slow, or break. This guide will show you how to remove your current hard drive in an Asus Q551LN-BBI7T09 laptop so you can replace it with a new one.

TOOLS:

- [T5 Torx Screwdriver](#) (1)
- [Phillips #1 Screwdriver](#) (1)

PARTS:

- [Asus Q501LA-BBI5T09 Hard Drive](#) (1)

Step 1 — Hard Drive

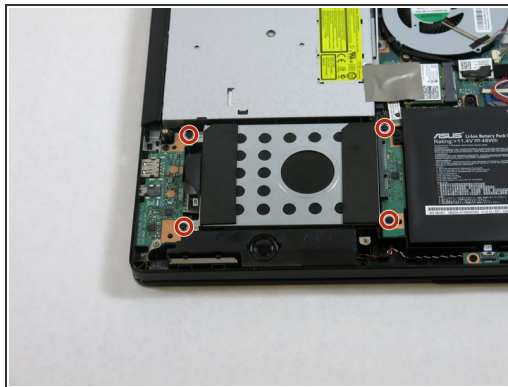

- Use a T5 (Torx 5) screwdriver to remove the ten 3.0 mm Torx screws from the base plate of the laptop.

Step 2

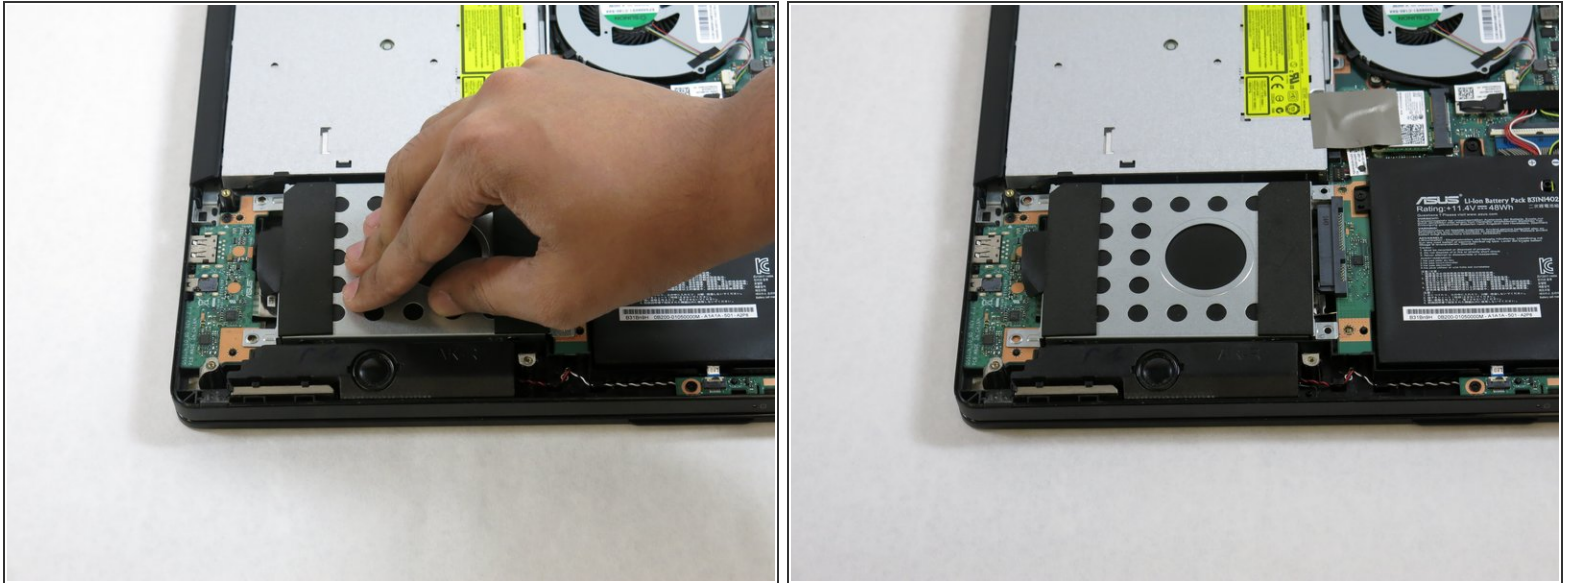

- Slowly and carefully pry open the base plate going around the edge.
- ❗ A card can be used to make the process easier.
- Grab the base plate and lift away from the laptop.

Step 3

- Use a Phillips #1 screwdriver to remove the four 3.0 mm Phillips screws around the hard drive.

Step 4

- Remove the hard drive from its port by sliding the hard drive left.

Step 5

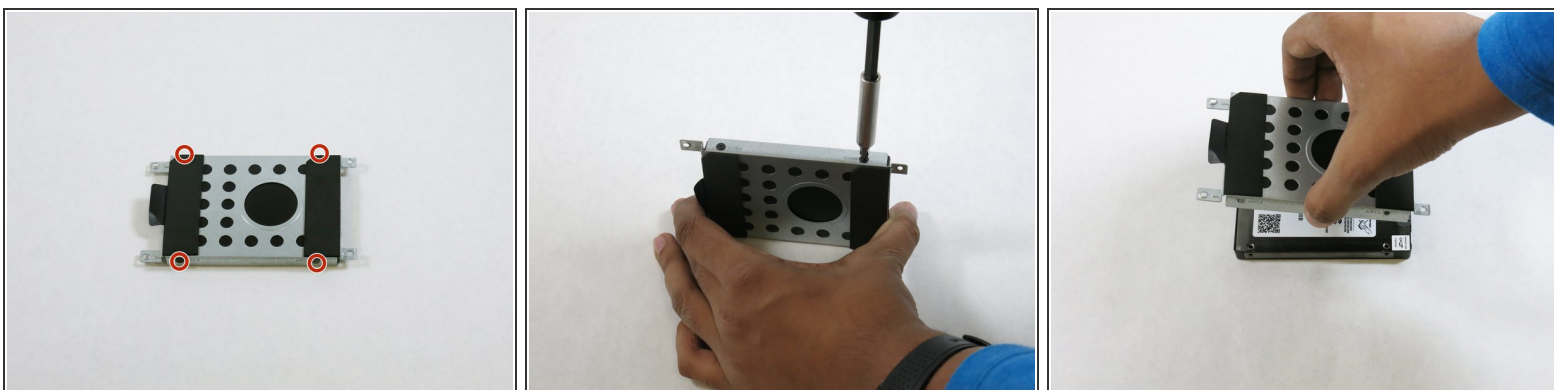

- Lift the hard drive out upwards.

Refrain from touching the green circuit boards.

Step 6

- Use a Phillips #1 screwdriver to remove the four 2.0 mm Phillips screws that secure the hard drive to its casing.

Step 7

- Place the new hard drive in the casing with the connection on the right side.
- Screw everything back together.

To reassemble your device, follow these instructions in reverse order.
