INTRODUCTION

Replacing the battery is helpful when the battery will not hold a charge for an extended period of time. Make sure the computer is unplugged and turned off the entire time. For any other problems follow the device troubleshooting page [here](#).

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Battery

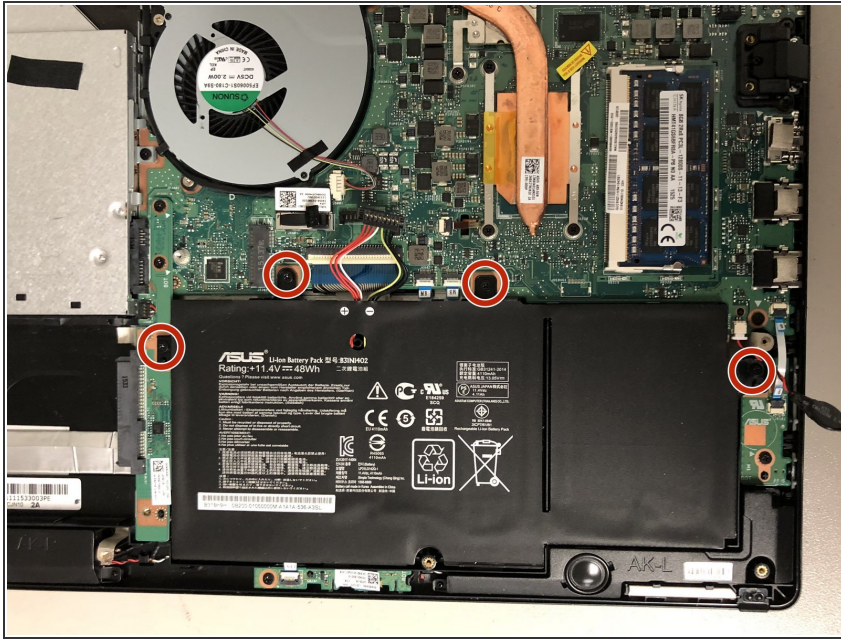

- Remove all ten screws on the back of the laptop to remove the cover.
- Remove the cover.

Step 2

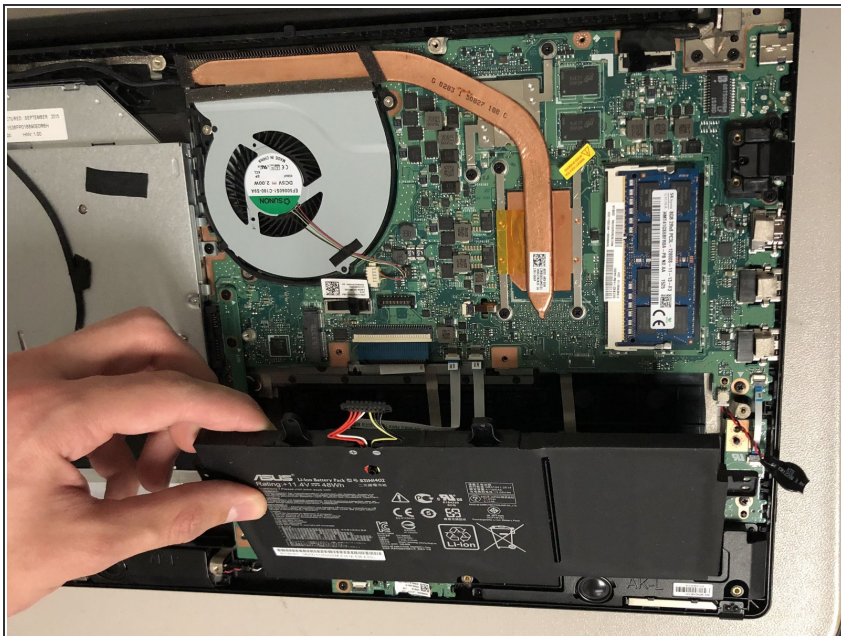

- Disconnect the wires at the top of the battery by lifting on the tabs protruding out of the plastic frame.

Step 3

- Remove the four screws holding the battery in place, two on top and one on each side.

Step 4

- Gently lift out the battery by the side closest to the motherboard first.
- ⚠ Be careful of any extra wires that may have attached itself to the battery.

To reassemble your device, follow these instructions in reverse order.
