INTRODUCTION

If your device has unlabeled, broken, or missing keys, they can be easily replaced with a new key. This guide shows you how to replace a key on your keyboard.

TOOLS:

- Spudger (1)

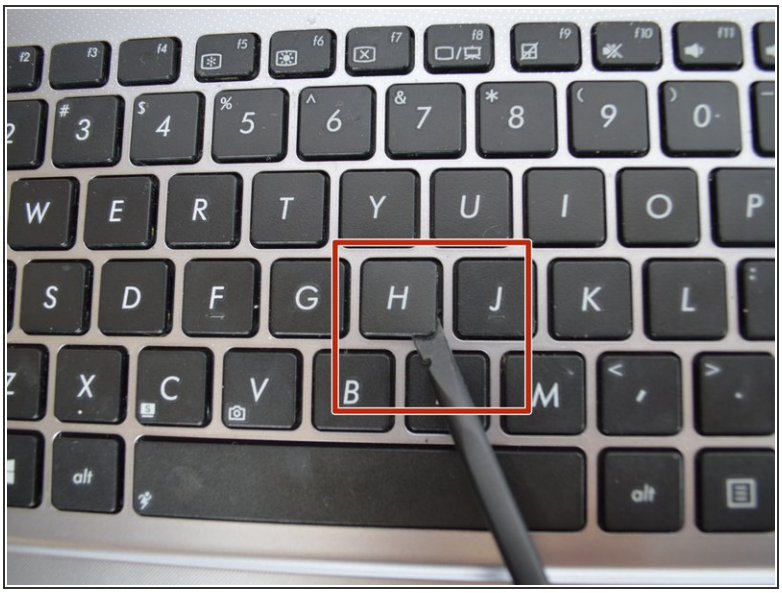
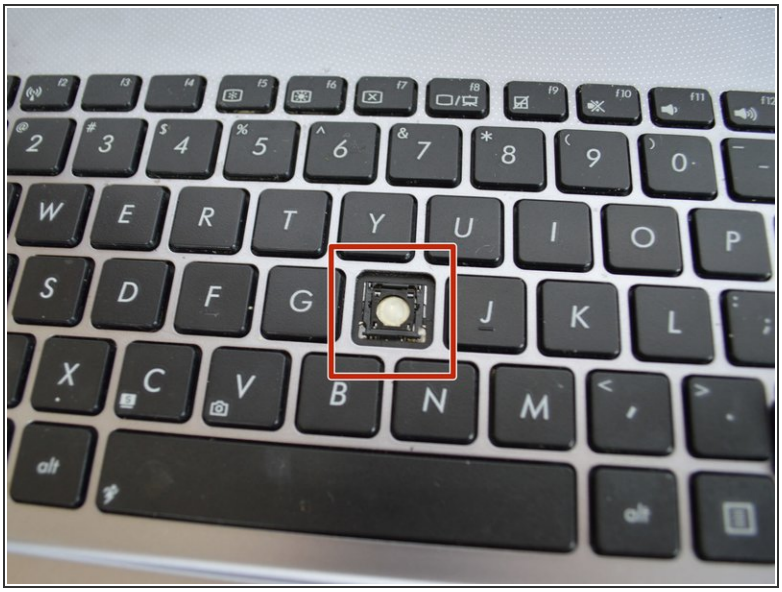
Step 1 — Sticking or Unresponsive Keys





- Slide the spudger under the key and raise each corner of the key.
  - The key should pop right out.

Step 2

- When putting a new key in, make sure all the corners are in.
- Press down firmly until you hear a click.

To reassemble your device, follow these instructions in reverse order.
