

Asus ROG G751JL-BB17T29 Top Rear Panel

Prerequisite guide for the removal of the Top Rear Panel.

Written By: Kristofer Cesaroni

INTRODUCTION

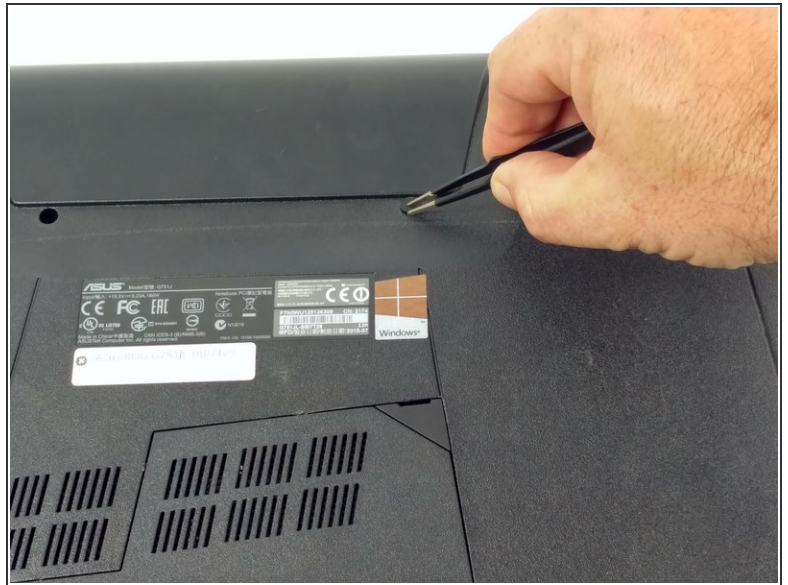

Prerequisite guide for the removal of the Top Rear Panel.

TOOLS:

- [Tweezers](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Top Rear Panel

- Remove the four rubber stoppers at the hinge edge of the laptop.

Step 2

- Remove the four 8.5 mm Phillips #1 screws at the hinge edge of the laptop.

Step 3

- ⓘ The speakers are located on the top facing side of the computer, next to where the screen connects to the base.
- Using a nylon spudger, carefully pry the top back panel off to reveal the speakers.
- ⚠ While removing the top back panel, be careful not to break the four pin connector located underneath.

Step 4

- Disconnect the four-pin connector and remove the top back panel from the computer.

To reassemble your device, follow these instructions in reverse order.
