Step 1 — Back Panel

- Flip over the tablet so the back cover is facing you. Hold the second button on the left below the volume buttons down until it powers off.

Step 2

- Beginning in the upper corner of the tablet, use the blue plastic opening tool and run it along the seam. Do this slowly so you don't cause damage to the device.

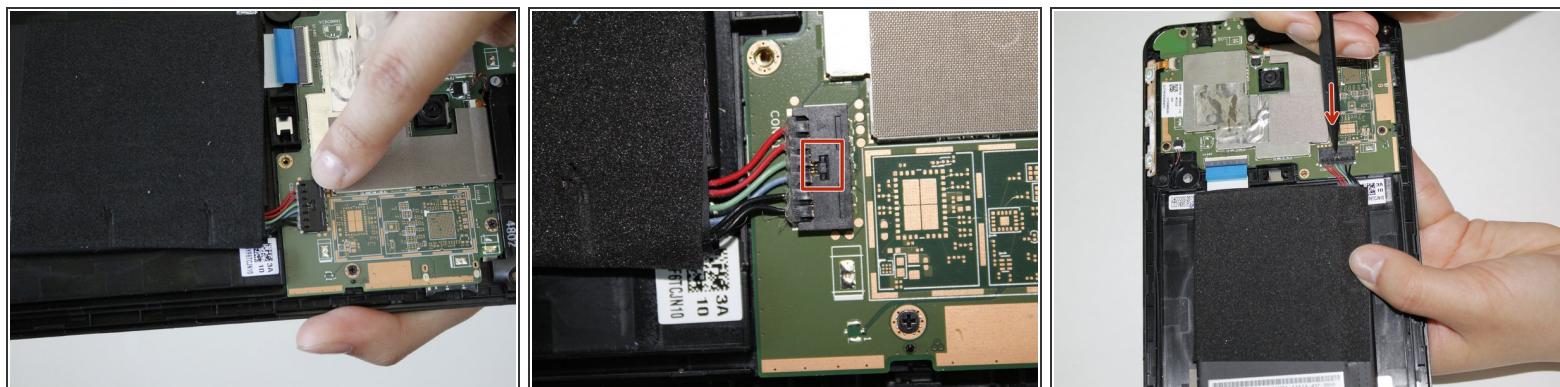

ⓘ If you are having trouble using the blue plastic opening tools, try using the black spudger instead.

Step 3

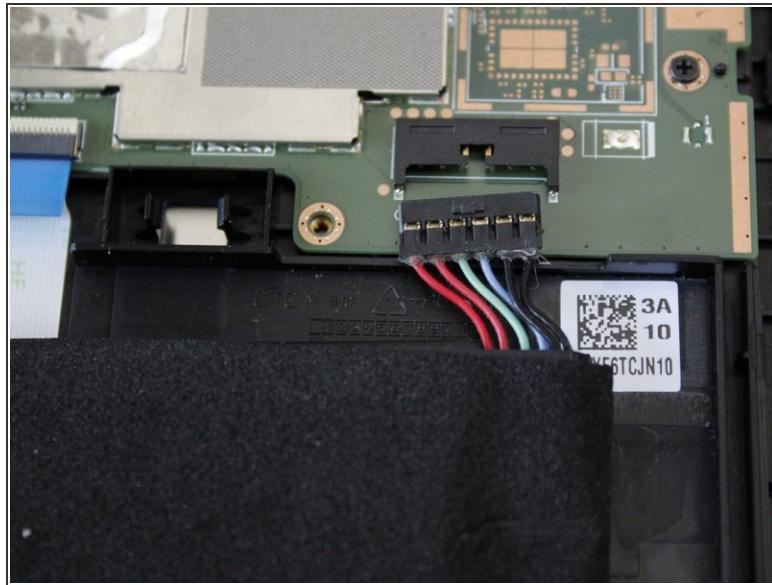

- Pull the rear panel and the display screen away from each other.

Step 4 — Battery

- Using the spudger, gently press on the black button on the plug port to release the battery from the plug.

Step 5

- Remove the battery from the device.

To reassemble your device, follow these instructions in reverse order.
