

# Asus V500CA-DB51T Hard Drive Replacement

How to replace the Hard Drive.

Written By: Galen P Garofalo

# INTRODUCTION

In this guide, you will learn how to replace the Hard Drive found in the Asus V500CA-DB51T. This guide was made to help with replacing a broken or defective hard drive, and is an easy repair for any skill level.

## TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Tweezers](#) (1)
-

## Step 1 — Battery

- Remove the following ten screws securing the lower case to the upper case:
- The top left and right corners have .7 cm screws.
- The two top-middle and four bottom are .4 cm screws.
- The middle left and right are .8 cm screws.
- Remove the screws using the Phillips #00 screwdriver.

## Step 2

- Wedge your fingers between the upper case and the lower case.
- Gently pull the lower case away from the upper case.
- Remove the lower case and set it aside.

## Step 3

- Use the flat end of the blue plastic opening tool to lift the battery connector up out of its socket on the motherboard.

## Step 4

- Remove the tri-point screws that secure the battery to the casing.
- All screws securing the battery in place are .5 cm tri-point screws.

## Step 5

- Use the opening tool to pop up the battery away from the casing.

## Step 6 — Hard Drive

- Remove the following screws securing the battery connector board to the logic board:
  - The red screws are size 2.3 cm T6 Torx
  - The orange screws are size 2.4 cm T6 Torx

## Step 7

- Remove the SSD (Solid State Drive) assembly from the upper case.

To reassemble your device, follow these instructions in reverse order.
