🔧 TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
Step 1 — Battery

- Flip the computer over so that it is upside down.

- Slide both latches away from each other (towards the outside).

- Push the battery out with your fingers.

- ⓘ The actual battery is not shown in the photograph.
Step 2 — Wireless Card

- Remove the six screws highlighted on the picture.

- Once the screws are removed, pry open the panel with the pry tool.

- It should now look like this.

Step 3

- After removing that panel, locate the screw on the right as highlighted.

- Remove that screw.

- Pry open the side panel with the small prying tool as shown.

- That panel should pop off and the wireless card will now be easily visible.

Step 4

- Place the small prying tool underneath the gold connector, apply pressure straight up, gently until it pops off.

- Repeat for the other one.

- Push them aside.

Step 5

- Locate tabs that are holding the wireless card in place. Highlighted in picture.

- Place one finger on each tab and press each to the side away from the wireless card as shown.

- The wireless card should pop up as shown. Pull up more with fingers to get more clearance.

Step 6

- To remove the wireless card, pull the card directly out.

- It should come out with just a little bit of pressure.

- Should look as shown when removed.

To reassemble your device, follow these instructions in reverse order.
