🔧 **TOOLS:**

- [Metal Spudger](#) (1)

Step 1 — Display

- Wedge a metal spudger between the bezel and display cover.

- Slide the metal spudger back and forth along the top, left and right sides to pry apart the screen from the outer shell.

Step 2

- Remove the 6 silver 2.7mm screws securing the screen bracket to screen bezel.

Step 3

- Slice the silver foil tape with a spudger by applying pressure between the frame and the back of the screen case.

Step 4

- Pull apart the black fabric tape with your fingers.

Step 5

- Use a plastic spudger to peel off the sticker label securing the LCD cable to the LCD display.

- Gently pull the sticker to disconnect the LCD cable. Do not use excessive force while removing the video cable attached to the back of the LCD.

Step 6

- Lift to remove the LCD screen.
