Step 3

- Once the back is off the device, unscrew the 7 1.2 mm phillips head screws that hold the battery in place. Use the smallest (#0) phillips head screw driver
  - Once the screws holding the battery are out, use the plastic opening tool to disconnect the battery cable ribbon from the motherboard

Step 4

- Remove the 7 1.2mm screws holding the secondary motherboard in place. Following that undo the speaker ribbon
  - Pop off the secondary mother board using your fingers.

Step 5

- Desolder the headphone jack or completely replace the secondary motherboard chip.

To reassemble your device, follow these instructions in reverse order.
