TOOLS:

- Phillips #0 Screwdriver (1)

PARTS:

- 500 GB 5400 RPM 2.5" Hard Drive (1)
- 1 TB 5400 RPM Samsung SATA Hard Drive (New) (1)

Step 1 — HDD (Hard Disk Drive)

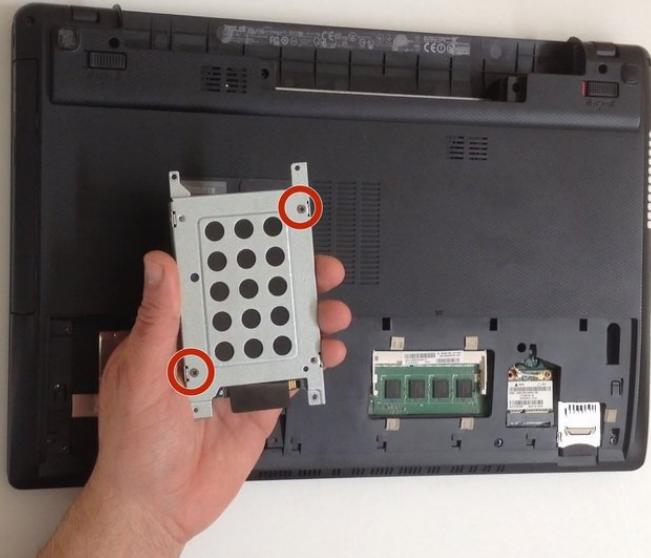

- Switch off the Laptop and remove the Battery.
- Unscrew the two Philips screws and remove the HDD / RAM Cover.

Step 2

- Remove three screws securing the hard drive caddy (hard drive assembly).
- Slide the hard drive assembly to the left to disconnect it from the motherboard.

Step 3

- Remove the two Philips screws and separate the HDD from the caddy case.
- You can install 2.5" SATA HDD, 5400rpm / 7200rpm, 320GB / 500GB / 750GB / 1TB.
- *(i)* After changing / upgrading the HDD you must install an operating system or clone & copy the information from the old HDD to the new one.
- .
- **Did you do it successfully.**
