Step 1 — Keyboard

- With the screen closed, place your laptop upside-down with the front facing you.

- Remove the six 14.6mm Phillips #00 screws.

- Remove the four 6.6mm Phillips #00 screws.

Step 2

- Flip the laptop over and open the lid.

- Pry around the edges of the laptop base using the plastic opening tool.

  ⚠️ Prying too hard can break the plastic clips.

This document was generated on 2019-10-09 10:51:40 AM (MST).

Step 3

- Carefully lift the keyboard up.

  ⚠️ Be very careful when lifting the keyboard up. Two zero insertion force (ZIF) cables are between the keyboard assembly and the motherboard. Do not lift the assembly too high.

- Disconnect the two ZIF connectors from the motherboard using your fingernail to lift the cream-colored tab.
Step 4 — Wireless Card

- Remove the single 4.7mm PH00 screw holding the wireless card to the motherboard.

Step 5

- Using your fingers, lightly lift up on the black and white antenna cords.

Step 6

- With your fingers lightly pull the wireless card out of the slot.
- ⚠ Make sure to keep the card parallel with the motherboard when removing from the slot.

To reassemble your device, follow these instructions in reverse order.
