INTRODUCTION

Before you replace your touch pad, make sure to plug an external mouse in. If you have never opened your laptop up, the back cover may not easily open.

🔧 TOOLS:

- Metal Spudger (1)
- Phillips #1 Screwdriver (1)

Step 1 — Touch Pad

- Unscrew the 10 5 mm #1 Phillips head screws in the corners of your laptop using the Phillips #1 screwdriver.
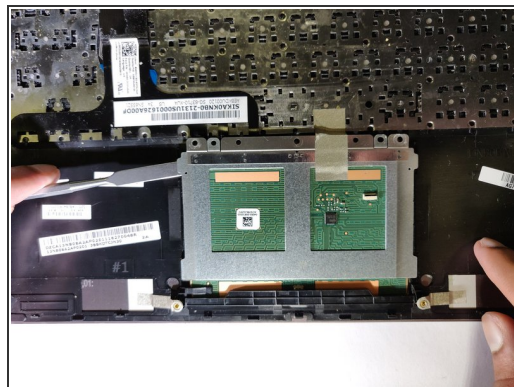

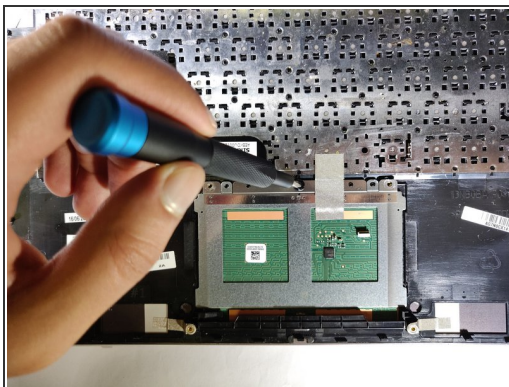

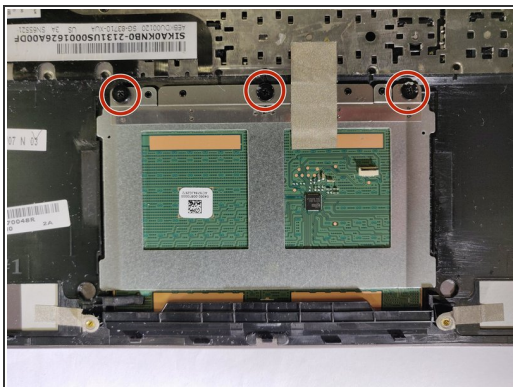

Step 2

- Pry back cover with metal spudger.

Step 3

- Unscrew the three 5 mm #1 Phillips screws on the touch pad with the Phillips #1 screwdriver.

- Lift touch pad with metal spudger.

To reassemble your device, follow these instructions in reverse order.
