

# Asus ZenPad Z8 Camera Replacement

This guide will show you how to replace the camera on the Asus ZenPad Z8.

Written By: mohamed sharif

## INTRODUCTION

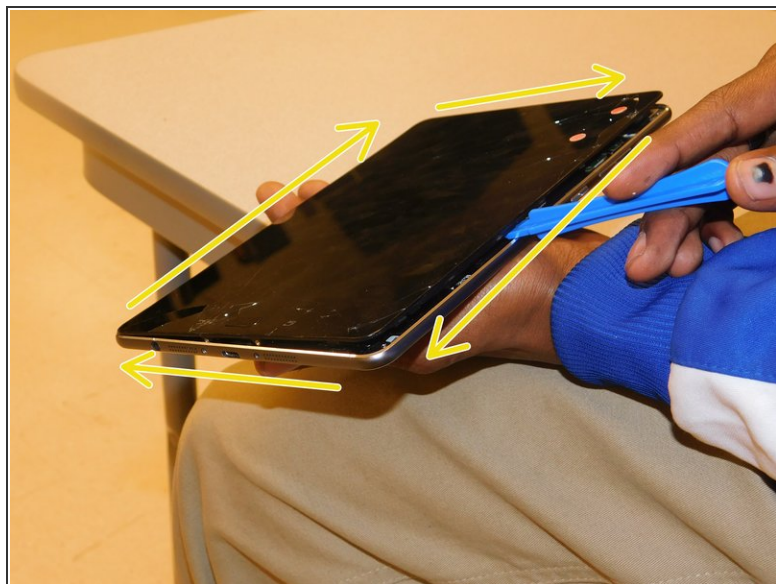

This guide will show you how to replace the Asus ZenPad Z8 Tablet's back-camera. If you have followed all of the other steps on the [troubleshooting guide](#) and they've failed to solve the problem, replacing the camera may be your best bet.

## Step 1 — Camera

- Turn off the power. The tablet has a hard power switch located on the right side.

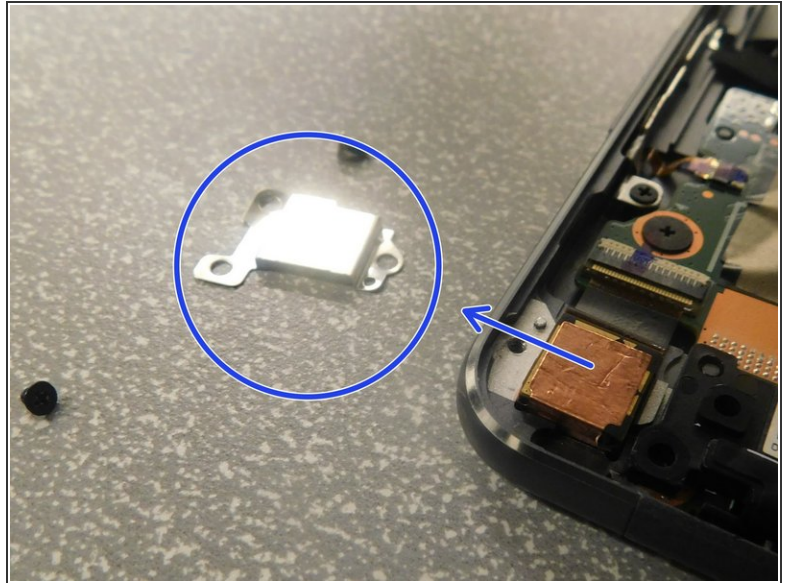

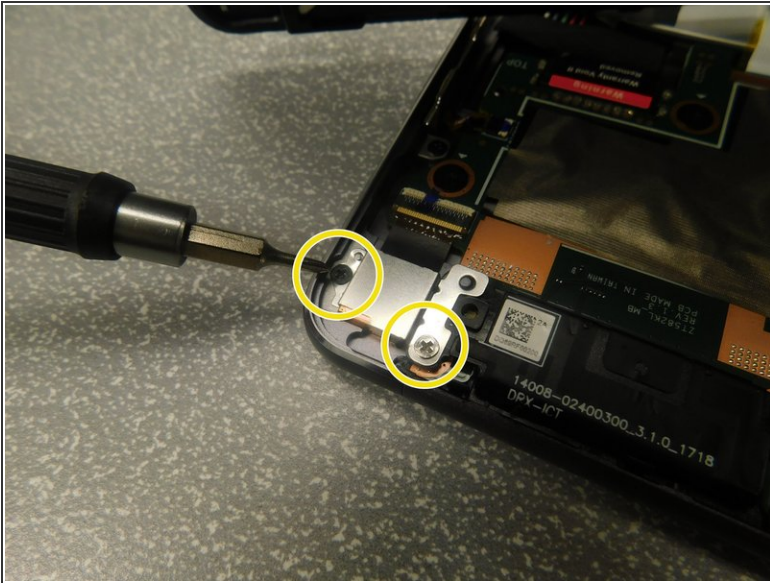

## Step 2

- Unscrew the screws located on the bottom and use the prying tool to open the tablet.

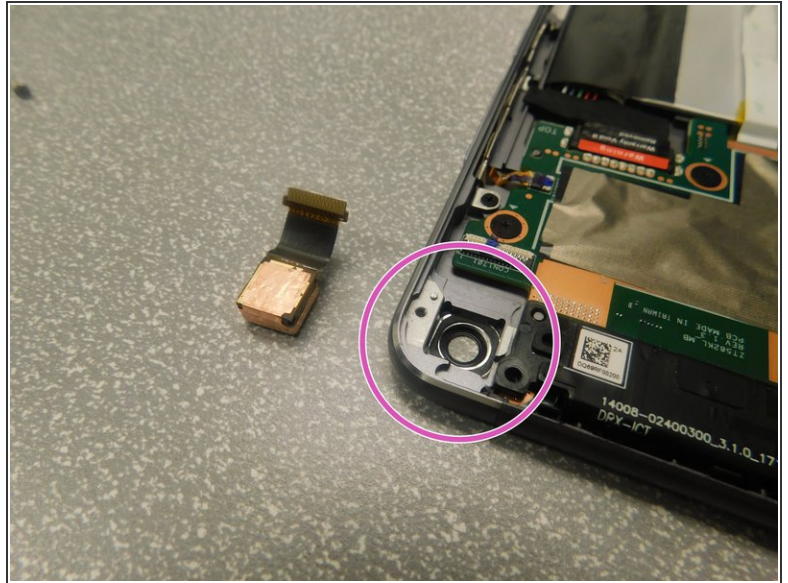

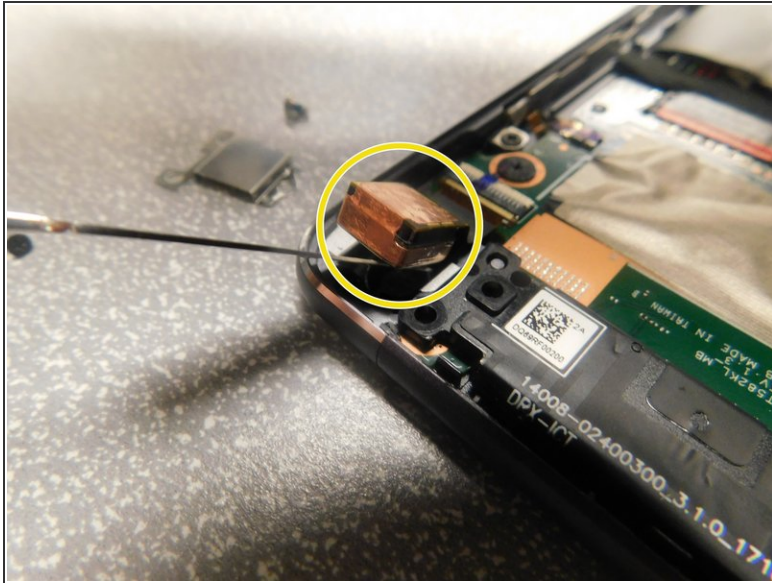

## Step 3

- Unscrew the two screws that hold the camera onto the back cover. Each screw is located on either side of the camera.
- Remove the camera cover piece.

## Step 4

- Use a prying tool to separate the camera, then pull to completely remove it.
- Reinstall the new camera, camera cover, and screws.

To reassemble your device, follow these instructions in reverse order.
