INTRODUCTION

The Asus ZenWatch 2 has a small speaker installed within the back side of the removable casing. This speaker serves a variety of functions from alerting users of incoming notifications to playing audio files such as music on the device. This guide will show users how to replace it if the part has become damaged or inoperable.

TOOLS:

- [T5 Torx Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Battery

- Remove the four 3.5mm screws to detach the case using the T5 screwdriver.

Step 2

- Slide the spudger under the battery and lift to remove.

Step 3 — Speaker

- Slide the metal spudger under the speaker and lift to remove it from the casing.

To reassemble your device, follow these instructions in reverse order.
