Step 1 — Camera

- Using a removable head screwdriver and a T4 bit, remove the screws on the base of the phone on either side of the charging port.
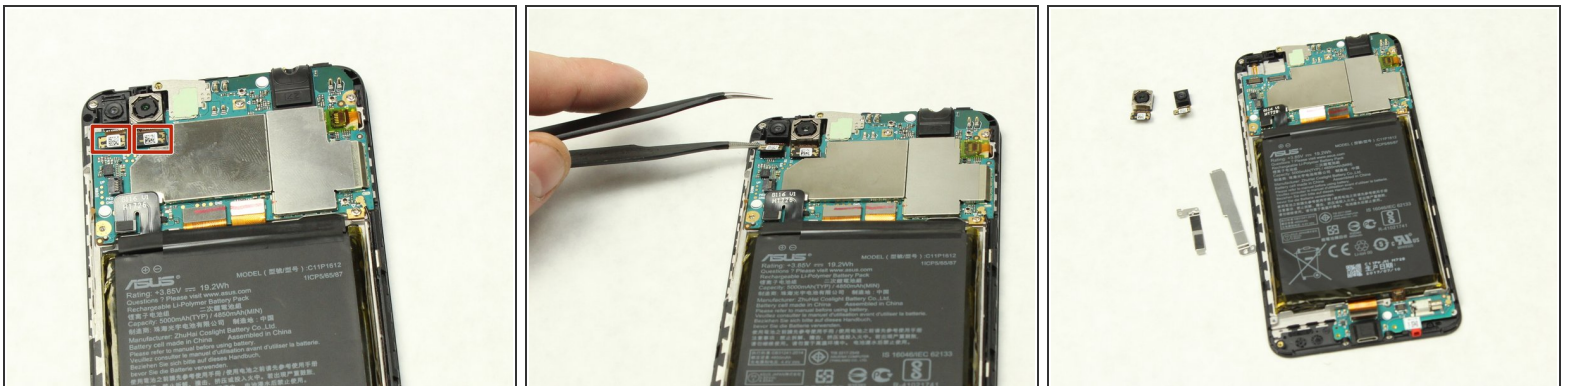

Step 2

- Starting near either of the 4 corners of the device notice the seam of the case around the front of the device.

- Begin using the opening tool with a moderate amount of force to wedge between the back case and the phone.

- Gently move the tool around the edges towards each corner until the back is removed.

- (i) You will be able to hear the back casing pulling apart from the phone. Do not be alarmed, but work gently with the device.

Step 3

- Using a removable head screwdriver and a PH0 bit, begin removing the panel beneath the two cameras by unscrewing the screw.

Step 4

- Use the tweezers to gently pull up on the flaps beneath the two cameras.

- Completely remove the cameras and replace with the new cameras.

To reassemble your device, follow these instructions in reverse order.
