AvertX HD810 Dome Cover Replacement

A replacement guide for replacing the clear dome cover for the AvertX HD810 security camera.

Written By: Elisabeth Garcia

INTRODUCTION

This guide covers removing the clear dome cover for the AvertX HD810 security camera. You need a T10 Torx security screwdriver and a replacement dome cover for the camera. *It's advised to have the camera turned off for this procedure.*

🔧 TOOLS:

- T10 Torx Security Bit Screwdriver (1)

Step 1 — Clear Dome Cover

- Lift off the paintable snap-on cover from the AvertX HD810 dome security camera.

⚠️ Optimally, the device should be turned off and the PoE (Power over Ethernet) unplugged.

Step 2

- Loosen **both** 10mm screws on either side of the clear dome cover housing using a T10 Torx security screwdriver.

ⓘ **It is not recommended to remove the screws from the clear dome cover housing.** The screws are apart of the cover and not intended to come out.

Step 3

- Gently pull off the clear dome cover from the camera base.

You've successfully replaced your AvertX HD810 clear dome cover when you've snapped back on your paintable snap-on cover. You can reassemble your device at any point by following the steps in reverse order.
