

Azpen A727 Back Cover Replacement

Removing Azpen A727 Back Cover.

Written By: Ikmemphis

INTRODUCTION

Use this guide to remove the back cover of the AZ 727. This may take a little time, so do not throw the device down in disgust.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Back Cover

- Remove two 3mm screws with the Phillips screwdriver.

Step 2

- Insert a plastic opening tool in the center then gently work towards the center.
- Work the opening tool around the edges to separate the back cover from the rest of the device.
- ❗ Once the first corner props open, the rest should open easily.

To reassemble your device, follow these instructions in reverse order.
